The ability to collaborate becomes increasingly a critical success factor for a sustainable economy and society. Therefore, information, services and processes of enterprises should be designed and implemented accordingly, to enable easy and flexible interoperability. This poses important challenges, including achieving societal acceptance, embedding in real-world practices, overcoming differences between collaboration partners, exploiting opportunities, adapting to change, and providing open solutions on top of various technologies.

The IFIP International Working Conference on Enterprise Interoperability (IWEI) is part of a series of conferences, which are organized by the IFIP TC5 Working Group 5.8 on Enterprise Interoperability. The IWEI series of conferences aim at identifying and discussing challenges and solutions with respect to enterprise interoperability, both at the business and the technical level. Since 2007, three IWEI conferences have been held in Munich (2007), Valencia (2009) and Stockholm (2011), and a next one is planned to take place in September 2012, in Harbin, China. IWEI 2013 is the 5th IWEI conference, this time organized in Enschede, The Netherlands.

This conference focuses on information, services and processes for the interoperable economy and society, and the corresponding enterprise interoperability challenges in the light of technology developments including the Future Internet. The conference seeks to promote the development of a scientific foundation for enterprise collaboration and interoperability; an architectural and methodological framework for addressing interoperability challenges from different viewpoints and at different levels of abstraction; new business and IT approaches for enterprise interoperability; methods and models to evaluate interoperability solutions; and practical solutions of enterprise interoperability.

<tbody>
<tr>
<td><strong>Session 1: Enterprise Service Interoperability</strong></td>
<td><strong>Session 3: Interoperability Methodology</strong></td>
</tr>
<tr>
<td>An Interoperability Points Based Interoperability Approach for SaaS Applications, Yanyan Han, Lei Wu, Shijun Liu and Xiangyu Meng</td>
<td>Fit for Purpose: Toward an Engineering Basis for Data Exchange Standards, Arnon Rosenthal, Len Seligman, M. David Allen and Adriane Chapman</td>
</tr>
<tr>
<td>Similarity Evaluation Based on Intuitionistic Fuzzy Set for Service Cluster Selection as Cloud Service Candidate, Jorick Lar-tigau, Xiaofei Xu, Lanshun Nie and Dechen Zhan</td>
<td>P2AMF: Predictive, Probabilistic Architecture Modeling Framework, Pontus Johnson, Johan Ullberg, Markus Buschle, Ulrik Franke and Khurram Shahzad</td>
</tr>
<tr>
<td><strong>Session 2: Enterprise Interoperability in Sectors</strong></td>
<td><strong>Session 4: Interoperability for Specific Application Types</strong></td>
</tr>
<tr>
<td>Achieving Flexible Process Interoperability in the Homecare Domain through Aspect-oriented Service Composition, Duc Viet Bui, Maria-Eugenia Iacob, Marten van Sinderen and Alireza Zarghami</td>
<td>Linked Services for Enabling Interoperability in the Sensing Enterprise, Matthias Thoma, Antonescu Alexandru-Florian, Theano Mintsi and Torsten Braun</td>
</tr>
<tr>
<td>On the Extended Clinical Workflows for Personalized Healthcare, Milan Zdravković and Miroslav Trajanović</td>
<td>Business Rules Management Service System: Added Value by Means of Business Interoperability, Martijn Zoet and Johan Versendaal</td>
</tr>
<tr>
<td><strong>Keynote 1</strong></td>
<td><strong>Keynote 2</strong></td>
</tr>
<tr>
<td><strong>Invited Paper Session</strong></td>
<td><strong>Session 5: Strategic and Tactic Aspects of Enterprise Interoperability</strong></td>
</tr>
<tr>
<td>Enhancing the Maturity of Open Service Ecosystems and Inter-enterprise Collaborations, Lea Kutvonen, University of Helsinki</td>
<td>Mass Customization Oriented and Cost-Effective Service Network, Zhongjie Wang and Xiaofei Xu</td>
</tr>
<tr>
<td><strong>Session 6: Ontology-based Interoperability</strong></td>
<td>Toward a Methodology to Control Interoperability Improvement Projects Execution, Taoudi Abderrahim, Bounabat Bouchaib and Elmir Badr</td>
</tr>
<tr>
<td>A Panorama of Ontologies in Semantic EAI Initiatives, Julio Cesar Nardi, Ricardo De Almeida Falbo and João Paulo A. Almeida</td>
<td>Using Meta Models and Ontologies for Enterprise Model Reconciliation, Sabina El Haoum and Axel Hahn</td>
</tr>

IWEI 2013 is hosted by the University of Twente (UT), situated on a beautiful campus between the cities of Enschede and Hengelo. Read more at <http://en.wikipedia.org/wiki/University_of_Twente>

Education and research at UT cover a broad spectrum of technical areas, including information technology, biotechnology and nanotechnology, in which business, behavioural and social sciences play a vital role. The university has approximately 9500 students and 3200 employees.

The Conference and Workshops will be held in the Conference Hotel Drienerburght at the UT campus.

Enschede is a vibrant and modern student city, located in the eastern part of The Netherlands, amidst the beautiful countryside of Twente. It is the largest city in the east of the Netherlands. It has a population of 160,000.

Once, Enschede was the centre of the textile industry. Nowadays, the textile industry has disappeared. Still, the heritage of the past can be traced back, looking at the villas and larger estates you can find in the Twente area.

Enschede is well-known in the Netherlands (and Europe) for its soccer club "FC Twente". There are several museums in Enschede, among them the Rijksmuseum Twenthe for art, a museum of natural history and one dedicated to the history of the textiles industry.
### Organization

**General Chairs**
Paul Oude Luttighuis, Novay, The Netherlands
Erwin Folmer, University of Twente, The Netherlands

**Program Chair**
Marten van Sinderen, University of Twente, The Netherlands

**Workshop Chair**
Martin Zelm, INTEROP-VLab, Germany

**IFIP Liaison**
Guy Doumeingts, INTEROP-VLab/University of Bordeaux, France

**Local Arrangements Chair**
Steven Bosems, University of Twente, The Netherlands
