

## Online presentation ABP Pension (English)

Our society is constantly changing and your pension is changing with it.

Changes in State pension ages, pension accrual and choices when you retire often make retirement a difficult subject.

For many people, retirement seems a long way off, for others it is getting closer and closer.

Either way, it is important to delve into your pension.  
And to get answers to questions like:

- Can I retire sooner, or later?
- What is conditional pension, and what should I look out for?
- How much pension and State pension do I accrue?
- How much pension can I have paid out if I retire?
- What happens to my pension if I work less?
- What is surviving dependents pension and what can I do with it?
- I want to make calculations myself: how does MIJNABP work?

Do you have these or similar questions?

### Retirement is important

As an employer, we think it is important that you know what the possibilities are with your ABP pension. That is why, in cooperation with ABP, we have organized an online presentation.

During this meeting you will receive answers to the above questions.

You can follow the presentation at home, or in the workplace, through Microsoft Teams. Microsoft Teams also offers the opportunity to ask questions to the ABP pension officer during the presentation, which can be done both verbally and through chat functionality..

However, the presentation is not intended to elaborate on personal case studies.

**Sign up for this online presentation? [CLICK HERE](#)**

Participants are asked to sign in to Microsoft Teams 10 minutes before the presentation starts so that the presentation can start on time.

The pension officer will not be able to solve the technical problems of participants during the presentation. Participants are therefore asked to try out the operation of Microsoft Teams before the presentation. Also, a fixed Internet connection often leads to more stable use than via Wi-Fi and the use of a PC or laptop is recommended.
