

SHIFT

Invitation opening exhibition

DESIGN UNITED

**TILT-SHIFT:
REFRAMING FUTURES**

Saturday 19 October - 14:00 hrs

Design United represents design at the intersection of advanced scientific research, fast-moving emerging technologies, and the shifting needs and dreams of our future societies.

Design is a powerful tool – increasingly used to shape the future. With this power, comes a responsibility for designers to work together. To unite. To better understand and respond to a rapidly evolving world. Design United does just this. As a 4TU Research Centre, it connects design research at TU Delft, TU Eindhoven, the University of Twente and Wageningen University & Research.

The Design United exhibition showcases critical as well as more optimistic visions of how design and technology will shape the world of tomorrow. Research topics range from digital-physical interaction to augmented health and the circular economy.

This exhibition is part of Dutch Design Week, one of the world's biggest and most influential design events.

We invite you to Design United to explore our research, test out our designs and talk to our creators.

TILT-SHIFT: REFRAMING FUTURES

Prof. Daan van Eijk
Prof. Berry Eggen
Prof. Mascha van der Voort
Directors of Design United

**Strijp-S, Klokgebouw 50
5617 AB Eindhoven**

Dates: 19 - 27 October, 11:00-18:00
