Subject: Response to the Education and Examination Regulations (EER) 2024-2025

The Programme Committee of the degree programme [name] has discussed the following documents related to the Education and Examination Regulations (EER) for the academic year 2024-2025:

- General part of the EER for bachelor's programmes of the BMS Faculty;
- General part of the EER for master's programmes of the BMS Faculty;
- The programme-specific part of the bachelor's programme [name programme];
- The programme-specific part of the master's programme [name programme].

The Education and Examination Regulations (EER) were discussed during the meeting of [date] where the programme director was present.

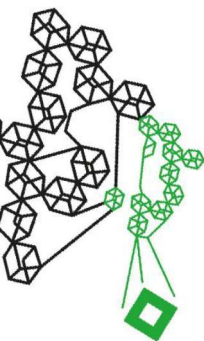

Based on this discussion and the rights as prescribed in articles 7.13 and 9.18 WHW:

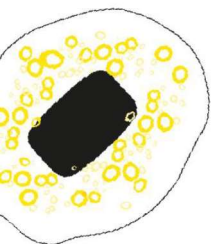

The Programme Committee advises to:

We advise positively with the following recommendations: Be aware of a possible disbalance in attending the elective masterclasses if the focus would be very strong on technical digitization issues. Second issue is evaluating whether the academic skills masterclass causes high study load in the first year.

The Programme Committee consents to:

1. The way in which the education in the relevant degree programme is evaluated
2. The content of specialisations within a degree programme
3. The qualities relating to the knowledge, understanding, and skills that a student should have acquired upon completion of the degree programme
4. Where applicable, the organisation of practical exercises
5. The study load of the programme and each of the units of study that form part of it
6. The choice of the official language for the degree programme

On behalf of the Programme Committee of [name],

Kind regards,

dr. J.A.M. de Kruijf

Chair Programme Committee MPM
