

# CITIES TO NATURE: Transforming cities towards nature-inclusive urbanisms with blue-green infrastructure, in Twente

UNIVERSITY  
OF TWENTE.

VU UNIVERSITY  
AMSTERDAM

**Thursday April 13th - 10:30h to 16:00h - Design Lab UTwente**

Are you interested in nature-inclusive infrastructure?

On the UTwente campus, we are developing the Living Innovation Lab (LILa). On this area development we will experiment with nature-inclusive, circular construction with a blue-green infrastructure.

On Wednesday April 13 we invite stakeholders, interested in blue-green infrastructure in Twente, to explore regional cooperation for this theme. We will cover both technical and social aspects of blue-green infrastructure, and both the development and use phase.

The program includes time for inspiration and immersion by means of cases and dedicated moments to meet and greet the participants.

You can register [here](#). We will publish more information about the program and speakers soon.
