COMMUNICATION SCIENCE AT THE UT

We study human behavior
based on the **interactions** we have
with **people and organizations**,
in **digital and physical places**,
and the **‘things’** around us.

We believe communication is changing and that technology offers unlimited possibilities to improve the way people communicate.

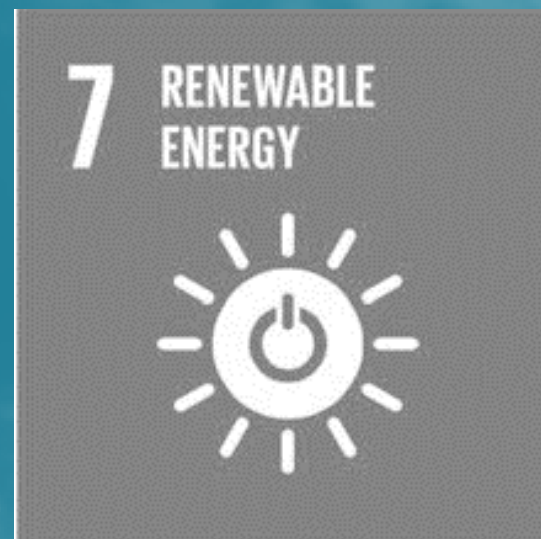

We educate future-proof communication professionals who know how to use these possibilities.

MASTERING COMMUNICATION SCIENCE

- MASTER COM STUDENTS AT THE UT ARE **ACADEMIC CITIZENS** THAT TRULY ENGAGE WITH **SOCIETAL CHALLENGES**.
- THEY EMBRACE **CHANGE** AND POSSESS KNOWLEDGE AND SKILLS THAT ENABLE THEM TO **STRATEGICALLY NAVIGATE CHANGE**.
- THEY HAVE BOTH GENERAL KNOWLEDGE ABOUT WHAT DRIVES HUMAN CHANGE AND **SPECIALIST KNOWLEDGE** BASED ON ONE OF THE TRACKS.

Double Degree Digital marketing (COM + BA)

Profile of the double degree programme Communication Science & Business Administration

- ICTs in today's society and in particular in the marketing domain
- From two highly related perspectives: Business Administration and Communication.
- Also focus on the role of design and behaviour change.
- Understand the most innovative technologies.
- And acquire the skills to manage the upcoming technological disruptions in marketing (both business and non-profit).

Topics:

- Social marketing and behaviour change.
- Smart marketing and smart environments.
- Visual communication and consumer neuroscience.
- Cognitive computing technology.
- Data analytics which includes coding, database access, data science and machine learning with Python.

Note: you need to be admissible to both programmes.

For more information consult our website and/or contact the study adviser.

Introduction

Informing patients about their health status is an integral part of many healthcare professionals' work, and this topic is addressed in depth during their education. Especially in case of bad news ("news that results in a cognitive, behavioral, or emotional deficit in the person receiving the news that persists for some time after the news is received"¹), the mode of delivery is highly important, since

Privacy valuation
Privacy intrusion

ABSTRACT

Research shows that people's use of computers and mobile phones is often characterized by a privacy paradox: Their self-reported concerns about their online privacy appear to be in contradiction with their often careless online behaviors. Earlier research into the privacy paradox has a number of caveats. Most studies focus on intentions rather than behavior and the influence of technical knowledge, privacy awareness, and financial resources is not systematically ruled out. This study therefore tests the privacy paradox under extreme circumstances, focusing on actual behavior and eliminating the effects of a lack of technical knowledge, privacy awareness, and financial resources. We designed an experiment on the downloading and usage of a mobile phone app among technically savvy students, giving them sufficient money to buy a paid-for app. Results suggest that neither technical knowledge and privacy awareness nor financial considerations affect the paradoxical behavior observed in users in general. Technically-skilled and financially independent users risked potential privacy intrusions despite their awareness of potential risks. In their considerations for selecting and downloading an app, privacy aspects did not play a significant role; functionality, app design, and costs appeared to outweigh privacy concerns.

Technology legitimization in the public discourse: applying the pillars of legitimacy on GM food

Sikke R. Jansma^a, Jordy F. Gosse^a, Kimberly Kuipers^b and Menno D.T. de Jong^a

^aDepartment of Communication Science, University of Twente, Enschede, Netherlands; ^bDepartment of Cultural and Social Science, Radboud University, Nijmegen, Netherlands

ABSTRACT

The public sphere, reflected by the public discourse, is an important domain for the legitimization of technology. In the institutional literature, four pillars of legitimacy are distinguished: normative, cognitive, regulative, and pragmatic. The aim of this study was to investigate to what extent these pillars can be used as a framework for analysing the legitimization of technological innovations in the public discourse. We conducted a qualitative media analysis of the case of GM food in the Netherlands, analysing 287 articles from nine Dutch newspapers in the period of 1996–2016. The results show that the pillars provide insight into legitimacy in a multi-dimensional way and serve as a structure for the dynamics of legitimization processes. Regarding GM food, the public debate was pre-dominantly negative, with a strong focus on the normative pillar. Emotional rhetoric exceeded knowledge and understanding (cognitive pillar) of GM food. The regulative and pragmatic pillars were hardly addressed.

Citizens' intentions to participate in governmental co-creation initiatives: Comparing three co-creation configurations

Menno D.T. de Jong^{a,*}, Sharon Neulen^b, Sikke R. Jansma^a

Decentral government

ABSTRACT

The awareness has grown that citizen participation may contribute to the quality of and support for government policies. This study focuses on citizens' intentions to take part in co-creation processes. Co-creation can be seen as an intensive type of citizen participation, involving active collaboration between government and citizens on specific policy issues. In the context of a Dutch province, we investigated citizens' intentions to participate in co-creation processes and experimentally compared the effects of three co-creation configurations (idea contest, grassroots groups, digital platform) on their intentions. Data were collected using online questionnaires (N = 354). Participants first answered general questions about their intentions to participate, and were then randomly assigned to a description of one of the configurations. Citizens' general intention to participate was related to their educational level, interest in provincial politics, perceived value of citizen participation, expected personal gratification, and perceived behavioral control. Of the three co-creation configurations, grassroots groups and digital platforms led to somewhat higher intentions to participate. An analysis of determinants per configuration shows that expected personal gratification played an important role in all three configurations. Perceived behavioral control was an additional determinant for the grassroots groups and digital platforms configurations. For digital platforms, trust in sincere intentions was a third determinant.

5 EC Research methodology and Descriptive statistics	5 EC Inferential statistics
4 EC Communication science theory	5 EC Global entrepreneurship & business
5 EC Academic skills	5 EC Researching strategy and marketing
1 EC Capita selecta Digital marketing	

- The Premaster is a half-year (30 EC) programme.
- You can start in either September or February.

Pre-master programme (COM / DD Digital Marketing)

30 EC study programme, prior to admission to the master COM / DD Dig Marketing

- The pre-master must be completed within one academic year (2 semesters)
- There is a maximum of two attempts for each course

Pre-master as a part of your HBO education

- Kies op Maat (KOM): <https://www.kiesopmaat.nl/over-kom>
- Only for students from related HBO programs

COM at the UT is...

PERSONAL SUPPORT

- STUDY ADVISOR
- TUTOR / MENTOR
- REGULAR APPOINTMENTS

Student guidance and well-being

Your first contact in the educational programme is your study adviser.

The study adviser:

- monitors study progress;
- advises and assists students with study-related issues such as study choices, progress, process, and planning and carrying out assignments;
- helps and advises students about their academic skills, studying under specific personal circumstances, and about rules and regulations.

Additional support:

- Student Affairs Coaching & Counselling (SACC): student psychologists, career counselling, confidential advisors, contact persons, UT Language Centre.

Admission criteria Master COM

A completed university bachelor degree programme (180 EC) in a related field

A completed HBO bachelor degree programme (240 EC) in a related field

An international bachelor's degree or equivalent in Communication Science (or closely related to Com Science)

For non-Dutch applicants: an Academic IELTS score of 6.5 (not obligatory for Dutch applicants)

For all applicants: sufficient skills in mathematics and English are expected (Mathematics comparable with mathematics or equivalent at pre-university education)

Direct or indirect admission?

Direct admission master COM

- Academic bachelors (BSc) in Communication Science (EUR, RUN, UvA, UvT, VU, WUR) and CIW (RUG, RUN, UU)

Indirect admission master COM

- Related HBO and academic bachelors → Pre-master (30 EC)
- Non-related HBO and academic bachelors → not admissible to (pre)master

Based on the content of your prior education, the admission committee will determine if you can be admitted directly to the master COM or if you first need to complete the Pre-master COM.

Indirect admission (premaster)

For questions, contact:

Jeanet Luijterink (Study Advisor (Pre-)Master COM)

E-mail: j.w.m.luijterink@utwente.nl

Related HBO bachelors (240 EC = 4 year) giving admission to the Premaster COM:

- (Technische) Bedrijfskunde
- Bestuurskunde
- Business IT & Management
- Commerciële Economie
- Communicatie
- Communicatie en Multimedia Design
- Communicatiemanagement
- Communicatiesystemen
- Creative Business
- European Studies
- Facility Management
- Hoger Hotel onderwijs
- Hoger Toeristisch en Recr. Onderwijs (HTRO)
- Informatie Dienstverlening en Management (IDM)

- Technische Commerciële Textielkunde

Tuition fees and application procedure

Tuition fees master and pre-master (2024-2025)

- **Pre-master** (EU and non-EU students) 30 EC programme = € 1157,-
 - Fixed amount per credit (€ 38,57 for 1 EC) *non-refundable*
- **Master (EU students):** one academic year = € 2314,-
- **Master (non-EU students):** one academic year = € 14.000,-
- For more information consult: https://www.utwente.nl/ces/student services/en/money_matters/tuition_fee/

Application procedure

- Always apply for the master COM, also in the case you need to do the pre-master programme.
- How to apply? Simply go to: <https://www.utwente.nl/en/education/master/how-to-apply/>

Admission deadlines

For questions, contact:

Jeanet Luijterink (Study Advisor (Pre-)Master COM)

E-mail: j.w.m.luijterink@utwente.nl

Dutch students who have completed a HBO/University degree:

Deadline for completion of the application and all required uploads:

- Start September: before 1 August 2025
- Start February: before 1 January 2025

International Visa students:

Deadline for completion of the application and all required uploads:

- Start September: before 1 May 2025
- Start February: before 1 October 2024

International Non-Visa students:

Deadline for completion of the application and all required uploads:

- Start September: before 1 July 2025
- Start February: before 1 December 2024
