

# REINVENTING UT – OUR PRINCIPLES

*We are the entrepreneurial university of technology, educating the next generation of ‘High Tech, Human Touch’ innovators to build a better world together.*

1

We need to transform to new **ways of working** and a new organisational culture and structures **now**.

2

Our core business is academic **education**. We prepare young people to tackle complex science/engineering/ societal challenges.

3

We do excellent **research** which goes hand in hand with our primary educational task. Our research has meaningful academic and societal **impact**. Academic staff is expected to be committed to teaching and research.

4

Meaningful **impact** means that we strive to put the needs of society at the centre when it comes to our education, research, and innovation activities.

5

An **entrepreneurial** mindset – in everything we do - is essential for our success. That includes frugality, financial hygiene, risk taking, and the discipline to stop activities.

6

The **integration** of social sciences & humanities with science and engineering disciplines sets the UT apart and is *essential*.

7

**Act** beyond our bubble! We will actively pursue collaborations with our local, national and international **partners** to create new opportunities for students here in the region and elsewhere.
