TECHMED SERIES

REMOVE THE BARRIERS TO MARKET READINESS

2019 – 2020 (3th season)

8 EVENT COURSES

TechMed Series

The TechMed Series “Remove the barriers to market readiness” is a one-year course of events for (future) entrepreneurs and scientists in medical technology. The series covers the most important, but also most challenging topics required for the development and production of safe, reliable and useful medical devices.

This season there are 8 inspiring sessions:

- Session 1: Getting started with the CE marking.
- Session 2: Involving end-users in the design process.
- Session 3: Risk management
- Session 4: Quality management in medical software (new course).
- Session 5: Clinical evaluation of your medical application.
- Session 6: production of medical devices in low quantities.
- Session 7: Design verification & validation.
- Session 8: Finding funding for your R&D (new course).
