

POLARISATION: A VR EMPATHY INTERVENTION

RISK & RESILIENCE FESTIVAL 4 NOVEMBER
2021

WHY MEDIATED TECHNOLOGY AS A POLARIZATION INTERVENTION TOOL?

- Contact with others (e.g. migrants) nurtures empathy
- Mediated technology as a way of creating such contact
- But how do we go from empathy for individuals to empathy for a group to combat polarizing tendencies?
- Aim: to develop a tool to find ways in which contact with others might make one more empathetic towards an outgroup

PROGRAMME TODAY

- Sneak preview to give an idea of what such a tool might look like
 - VR Showcase
 - Phone game
- Mentimeter + group conversation to discuss in what ways a polarization intervention tool might be helpful to you
