UNIVERSITY OF TWENTE.

MOBILITY-ONLINE

Newsletter Mobility-Online – No. 10 – October 2023

Hello all!

Looks like fall is heading our way; leaves starting to change colours, cinnamon and spice in our coffee and candles on the side tables.

Testing of the new user interface?

As we have mentioned before, Mobility-Online is getting a visual overhaul. The student's view has already been implemented in the test environment and we are currently testing this. As we do, we are preparing side by side shots of the main elements of the registration form and the workflows to follow.

Also, we will be inviting some of our (key) users to test the new interface with us so that we can identify and address any potential issues before going live with the new layout. These tests will be taking place in the next couple of months.

Sharing knowledge with RUG, University of Tilburg & UCLL

In the past couple of weeks we have come to meet with University of Groningen and the University of Tilburg. We have shared our ways of implementing and supporting mobility processes in Mobility-Online, how to deal with the implementation of Erasmus Without Paper (EWP) and issues surrounding this. Getting to know how other institutions make use of Mobility-Online has helped us improve efficiency of pipelines and gives us new ideas on how to implement processes and their changes. As well as giving us new ideas on how to support you.

In November we will be traveling to Hasselt to visit with the University College of Leuven and Limburg. Here we will share more information and experiences regarding Mobility-Online, building processes in the system, making use of specific functionalities as well as helping each other out on making Mobility-Online work better for you, our end users.

Tips & Tricks

Application and Exchange program management: Application statuses
As you will most likely have noticed, some applications are displayed highlighted. Please consult the overview to the right to see what the different colours mean.

Description

These are applications that are cancelled.
These are applications that are finished.
HR student; this is for incoming students where the HR department needs to be informed due to visa related actions.
NON EU students; this is for incoming exchange to easily identify, which deadlines apply for the students.
Deadlines regarding scholarships.
