

TNO & UT JOINT EVENT

How can (fundamental) research lead to innovation and impact? How can you collaborate with applied research organizations? The University of Twente and TNO jointly organize an event to explore how we can turn fundamental research into innovations with impact together in the areas of circularity, energy transition, digitalization, housing shortage, quantum computing, robotics, photonics, and bio-microsystems.

If any of these themes interest you, be sure to attend this event on **June 25th!** During the event, you can get to know employees of TNO working on similar topics to take the first steps towards new collaborations.

Program of the day:

- 13:00 - 14:00** Opening lecture TBA
- 14:00 - 14:30** Preconceptions: dusty white coats and slick consultants?!
- 14:30 - 16:30** Speed dates: for the love of science
- 16:30 - 16:45** Slick white coats and no dusty consultants!
- 16:45 - 18:00** Closing and networking with drinks

Location: TNO Utrecht, Princetonlaan 6, room PRL6 0.21A

Date: June 25th, 13:00 - 18:00

This event is targeted at **assistant professors and postdocs**, but other researchers who are interested in getting to know TNO better are also welcome! A limited number of spots is available, so register now!
