Spatial Engineering

**Note:** the master admission requirements listed are an indication of what is required to become admissible for the masters' programmes. Always check if these requirements still apply with the master's programme you choose.

**Note:** in addition to fulfilling the requirements set by a master's programme, there is often room for other elective courses and/or modules. Please be aware of any rules and admission requirements, e.g. no overlap in content & sufficient difficulty level. Furthermore, access to elective courses can be restricted, depending on prior knowledge & rules adhered to by the module and coordinating studies (e.g. B-TCS modules can only be taken as a whole). Contact your study advisor to specify your plans.

Webpage <https://www.utwente.nl/en/am/>

 Contact person [Lisette van den Broek](#)
**Procedure for admission**

Before the minor registration deadline, please arrange a meeting with your study advisor and Jan Schut (AM coordinator) to discuss the requirements for the master's programme. Requirements may be subject to change depending on overlap in B-AT subjects.

IM: in-depth minor module  
JM: Join-in Minor module  
HM: High Tech/Human Touch Minor module

= Possible to take both, or to make a selection. \*

\* If you also want to take both Biorobotics and AT M6c Systems&Control, first take Systems&Control and then Biorobotics variant B in Control of Robotic Systems.

\*\* If you're doing both Systems & Control and Biorobotics, you should take 'variant B' in Control of Robotic Systems within Biorobotics

**Procedure for admission**

Somewhere around May/June of your 2nd year, please send an e-mail about your participation to Ms. Elora Luijkx, pre-master coordinator of the faculty Engineering Technology and Peter Jansen, programme coordinator CE/CEM/CME.

\* The Minor 'Designing Constructions' contains the course Calculus 2. This course should be replaced with a relevant 3 EC course.

\*\* The Minor 'Safety and Risk in Deltas' contains the course Vector Calculus. This course should be replaced with a relevant 2 EC course.

\*\*\* The Minor 'Traffic and Transport' contains the course Linear Algebra. This course should be replaced with a relevant 3 EC course.

= Possible to take all modules for a track, or to make a selection. Full modules are required, unless indicated otherwise \*, \*\*, \*\*\*

**Master: Construction Management and Engineering (4TU)**

Admission requirements 2024/2025

Webpage <https://www.utwente.nl/en/cme/>Contact person [Peter Jansen MSc](#)**Procedure for admission**

Somewhere around May/June of your 2nd year, please send an e-mail about your participation to Ms. Elora Luijkx, pre-master coordinator of the faculty Engineering Technology and Peter Jansen, programme coordinator CE/CEM/CME.

| Block | Code      | Name                                      | EC  | Remarks  |
|-------|-----------|---|-----|--|
| 1.A   | 202000695 | Engineering Solid Mechanics               | 4   | Mandatory prior knowledge for Designing Constructions (2B) |
|       |           |   | 11  | Free choice  |
| 1.B   |           |   | 11  | Free choice  |
|       | 202000668 | Preparation Bachelor Assignment AT        | 4   | Year   |
| 2.A   | 202000670 | Bachelor Assignment AT                    | 15  | AT M12   |
| 2.B   | 202000060 | Designing Constructions * <b>OR</b>       |     | CE M4  |
|       | 202300123 | Structural Mechanics 2                    | 3   |  |
|       | 202000062 | Introduction Project Disciplines          | 4,5 |  |
|       | 202000063 | Project                                   | 4,5 |  |
|       |           |   | 3   | Free choice  |
| 1.B   | 202100168 | Sustainable Civil Engineering             |     | CE M6  |
|       | 202100169 | Design Strategy and Evaluation            | 3,5 |  |
|       | 202100170 | Structural Mechanics 3                    | 3,5 |  |
|       | 202100173 | Energy                                    | 2   |  |
|       | 202100172 | Social Sustainability                     | 3   |  |
|       | 202100171 | Environmental and Economic Sustainability | 3   |  |

\* The Minor 'Designing Constructions' contains the course Calculus 2. This course should be replaced with a relevant 3 EC course.

= Possible to take all, or to make a selection.

IM: in-depth minor module

JM: Join-in Minor module

HM: High Tech/Human Touch Minor module

= Possible to take all, or to make a selection. \*

= Pick one out of two.

\* any combination of 2 (out of possible 4) modules is enough for admission into the Master CS, see [www.utwente.nl/en/csc/premaster/transfer-ut-bachelor/](http://www.utwente.nl/en/csc/premaster/transfer-ut-bachelor/). Both modules need to be completed as a whole (or 12EC, CS2) in order to be eligible for admission.

\*\* The Module 'Software Systems' contains the course Calculus 1B. This course should be replaced with a relevant 3 EC course (examples given in matrix).

Note! Most modules have limited availability and are not open to registration for students outside (CS, EE, AM). Make sure to register on time through [www.utwente.nl/minor](http://www.utwente.nl/minor).

**Procedure for admission**

At the end of the second year, contact the bachelor's coordinator of CSE (bachelor-cse@utwente.nl) about participation CSE module 7.

Please contact Charlotte Diepenmaat for an introductory meeting before the start of the master's (around the end of your third year).

### Procedure for admission

In order to be granted admission to the courses listed below, please send an e-mail to Hiske Schuurman-Hemmer ([h.m.hemmer@utwente.nl](mailto:h.m.hemmer@utwente.nl)) stating which courses you'd like to join at which time. Send the email before the 1st of August in order to be granted admission to these courses.

**Master: Industrial Engineering and Management**

Admission requirements 2024/2025

Webpage <https://www.utwente.nl/en/iem/>Contact person [N. van der Veen](#)**Procedure for admission**

Please send Mr N. van der Veen, programme coordinator of IEM, an email that includes a motivation letter about the specialization of your choice and an up-to-date transcript of records.

**Note**

Please note that these courses are pre-master courses. The pre-master has to be completed successfully within one academic year (with no more than 2 exams per course) to be admitted to the master's programme. Not meeting these prerequisites means that you don't have access to the master IEM.

**Track: Financial Engineering**

Option 3 (if you did M6c Systems and Control in your 2nd year)

| Block    | code      | name   | EC  | Remarks                    | minor |
|----------|-----------|--|-----|----------------------------|-------|
| (B2) 1.A | 202000695 | Engineering Solid Mechanics *                  | 4   |                            |       |
| 1.A      |           |  | 15  | Free choice                |       |
| 1.B      | 202000158 | Aeronautical Engineering: Aircraft Engineering | 15  |                            | HM    |
| 2.A      | 202000149 | Introduction Finite Elements - PB              | 3,5 |                            |       |
|          | 202000138 | Fluid Mechanics 1 - PB                         | 3,5 | Overlap with M6b           |       |
|          | 202000139 | Heat Transfer - PB                             | 3,5 | Overlap with M6b           |       |
|          | 202000668 | Preparation Bachelor Assignment AT             | 4   | Year                       |       |
|          | 202000243 | Introduction Mechanical Engineering - PB       | 5   | Mandatory in either B or M |       |
| 2.B      | 202000670 | Bachelor Assignment                            | 15  | AT M12                     |       |
|          | 202000143 | Dynamics 2 - PB                                | 4,5 |                            |       |

\* 202000695 Engineering Solid Mechanics can be replaced with 2020001410 Mechanics of Materials in 2.B (3 EC).

\*\* If you also want to take both Biorobotics and AT M6c Systems&Control, first take Systems&Control and then Biorobotics with the advanced variants of Control of Robotic Systems and Biomedical Signal Analysis.

\*\*\* If you're doing both Systems & Control and Biorobotics, you should take 'variant B' in Control of Robotic Systems within Biorobotics

note

AT - M6b CSE module 6 Transport Phenomena is equivalent to Fluid Mechanics 1 and Heat Transfer in Block 2A

AT - M6c Systems and Control - AT is equivalent to Biorobotics in block 1A

IM: in-depth minor module

JM: Join-in Minor module

HM: High Tech/Human Touch Minor module

## Master: Nano Technology

Admission requirements 2024/2025

 = Possible to take both, or to make a selection. \*

 = Optional

\* If you also want to take both Biorobotics and AT M6c Systems&Control, first take Systems&Control and then Biorobotics with variant B of Control of Robotic Systems.

\*\* There is overlap in content between 2020000979 Smart Technology and 202001031 Intelligent Interaction Design.

Combination is not allowed.

\*\*\* If you're doing both Systems & Control and Biorobotics, you should take 'variant B' in Control of Robotic Systems within Biorobotics

**Master: Spatial Engineering**

Admission requirements 2024/2025

Webpage <https://www.utwente.nl/en/education/master/programmes/spatial-engineering/>  
Contact person [Drs. T.R. Luiten MBA](#)

**Procedure for admission**

Since there is no fixed programme that determines your admission to the programme, you can contact Ms. T.R. Luiten if you are interested in the Spatial Engineering master's programme.

To allow students to meet the final qualifications of the Spatial Engineering programme it is necessary that incoming students have knowledge at bachelors level of a research university in at least three of the following topics:

- Water, weather and climate (hydrology, meteorology)
- Earth sciences (geo-engineering, geology, earth surface processes)
- Civil engineering (infrastructure, building, hydraulics, hard interventions)
- Spatial planning and governance (urban and or rural environments)
- Spatial information and visualization (GIS, Remote Sensing)
- Software engineering

| Block | code      | name  | EC | Remarks      |
|-------|-----------|---|----|--------------|
| 1.A   | 201500060 | Geographic Information Systems                      | 15 | Recommended* |
| 1.B   | 202200306 | Adapting to climate change with Spatial Engineering | 15 | Recommended* |
|       | 201500062 | Earth Observation                                   | 15 | Recommended* |
| 2.A   |           |   | 11 | Free choice  |
|       | 202000668 | Preparation Bachelor Assignment AT                  | 4  | Year         |
| 2.B   | 202000670 | Bachelor Assignment AT                              | 15 | AT M12       |

\*These modules provide knowledge in the fields mentioned above, providing the most direct access to the Master.

 = Optional

**Procedure for admission**

There is no specific procedure for admission. You can just enrol for the master's programme.

**There is not a strict set of modules or courses required to be admissable for the SET master's programme.**  
**This overview shows the recommended courses preferred by the AT programme.**

| Block | code      | name                                      | EC  | Remarks         | minor |

|       | 202000668 | Preparation Bachelor Assignment AT                    | 4  | Year   |       |
| 2.B   | 202000670 | Bachelor Assignment                                   | 15 | AT M12   |       |

\* There is overlap in content between 202000736 Physical Transport and 202000137 Fluid Mechanics and Heat Transfer. Combination is not allowed.  
\*\* If you also want to take both Biorobotics and AT M6c Systems&Control, first take Systems&Control and then Biorobotics with the advanced variants of Control of Robotic Systems and Biomedical Signal Analysis.

IM: in-depth minor module

JM: Join-in Minor module

HM: High Tech/Human Touch Minor module

= Pick one out of two.

## Master: Water Technology

Admission requirements 2024/2025

Webpage <https://www.utwente.nl/en/education/master/programmes/water-technology/>

Contact person Karolina Smiech - karolina.smiech@wetsus.nl

Valentina Sechi - valentina.sechi@wetsus.nl

### Procedure for admission

Please contact Master Water Technology (MWT, information above) for an introductory meeting before the start of the master's (around the end of your third year). It is also highly recommended to visit MWT (at Wetsus in Leeuwarden) before starting the preparation for this master's.

| Block | code      | name                                     | EC  | Remarks                          |
|-------|-----------|--|-----|----------------------------------|
| 1.A   | 201800102 | Basics for Process Simulation            | 5   | Course as preparation for CSE M8 |
|       |           | Optional                                 |     |                                  |
|       | 202000733 | Industrial Processes *                   |     | CSE M5                           |

| 1.B   | 202000736 | Physical Transport                       |     | AT M6b                           |
|       | 202000737 | Physical Transport Phenomena             | 7,5 |                                  |
|       | 202000738 | Project Transport Phenomena              | 4   |                                  |
|       | 202000739 | Numerical Methods                        | 3,5 |                                  |
|       | 202000668 | Preparation Bachelor Assignment AT       | 4   | Year                             |
| 2.A   | 202000670 | Bachelor Assignment                      | 15  | AT M12                           |
| 2.B   | 202000744 | Process Design                           |     | CSE M8a                          |
|       | 202000745 | Intr. Chemical Reactor Engineering       | 4   |                                  |
|       | 202000746 | Intr. Separation Methods                 | 4   |                                  |
|       | 202000747 | Project Process Design                   | 7   |                                  |

IM: in-depth minor module

JM: Join-in Minor module

HM: High Tech/Human Touch Minor module

 = Optional

\* There is overlap in content between 2020000638 Physical Chemistry of Interfaces (M6a) and 202000733 Industrial Processes. Combination is not allowed.

## Courses that you may consider for the design component in the AT elective space

Students who started AT during TOM 2.0 (in 2020 or later) need at least one course with a design component in the elective space (year 2 or 3). The examination board checks this on the course list that students submit before starting year 3. The required [form](#) contains the question “*With which course(s) do you fulfill the requirement to have a design project in B3, or in the elective part of B2?*”

The list below suggests suitable courses. When picking one of these suggested courses, the question on the form can simply be answered with the course name and no further explanation. Other courses that are not on this list can also be proposed, but in that case the answer to the question on the form should also explain what is the design component of this course.

Q1 and Q2 have the most options. Students who are busy during Q1 and Q2 with mandatory courses for admission to a Master’s (e.g. APh/BA/NT) can always opt for AT module 11 in Q3.

In Q1

| Course  | ILO / description  |
|---|--|
| AT M5 202000644 Electronics                             | <b>ILO: design, simulate, build and measure circuits with transistors according to a given set of specifications. (The final project of this module is the design, realization and characterization of an RF-transmit-receiver system to transmit audio wirelessly.)</b> |
| 202000853 Biorobotics                                   | ILO: Design a robot for application to a biomedical problem using multidisciplinary knowledge from mechanical, electrical, control and software engineering domains. (application and synthesis)   |
| 202000158 Aircraft Engineering                          | The content of the lecture series will be applied in an assignment in which a Concept Design of an Aircraft has to be made. (The details of this design process are spelled out further in the ILO’s.)   |
| 202001137 Digital Hardware                              | Part of MAM for M-EE and EMSYS. Contains a design project with ILO: can design a system based on a list of requirements and explain how the design complies with these requirements  |
| 202000201 Project Human Product Relations               | Part of MAM for M-IDE. The project brief is to design an intervention for a public space. ILO: Designing products with a specific influence on the interactions of humans and products.  |
| 202000230 Science to Society: From Idea to Prototype    | During the module, you have to be creative and work in a multidisciplinary team to integrate knowledge from different domains in a product you are going to design.  |
| 202000093 Smart Cities - Multifunctional Flood Defences | ILO: integrate state-of-the-art knowledge into the design of MFDs within an interdisciplinary team; present and visualize the final design using a (physical) model.   |

In Q2

| Course   | ILO / description   |
|--|---|
| <b>AT M6c 202001142 Project Systems and Control</b>  | <b>ILO: get experienced designing feed-back control of linear/linearized dynamic systems</b>  |
| <b>AT M6d 202001064 Software Development (BIT)</b><br><br><b>Or 202001024 Software Systems (TCS)</b> | <b>In this module the students are introduced to the design, implementation and testing of software systems, and to performing a project independently. (The details of this design process are spelled out further in the ILO's).</b>                              |
| 202000158 Aircraft Engineering   | The content of the lecture series will be applied in an assignment in which a Concept Design of an Aircraft has to be made. (The details of this design process are spelled out further in the ILO's.)  |
| 202001032 Intelligent Interaction Design Core  | Part of MAM for M-ITech. ILO: can design, develop and evaluate low fidelity and high fidelity prototypes of an intelligent interactive system that is well justified in context.  |
| 202001164 Lab on a Chip  | To have the students understand, design, make and measure with a lab on a chip system for a real-life measurement problem.  |
| 202000099 Smart Ways To Make Smart Cities Smarter  | During the Design Project part, students work to improve existing technologies and methods for smoother city upgrading and renewal.   |
| 202001418 Innovations in Sustainable Chain Management: Design  | (Re-)Designing elements of the supply chains and relevant network is the central focus in this module. ILO: contribute to a multidisciplinary team on design efforts towards a complex societal relevant problem/challenge related to sustainable chain management. |

In Q3

| Course                             | ILO / description  |
|------------------------------------|--|
| AT M11 202000665 MEMS Design       | <b>ILO: Design a micromechanical device or systems (sensors, actuators and fluidic devices or systems) based on a fixed fabrication process.</b>   |
| 202000077 Project Area Development | Part of MAM for M-CEM track Integrated Civil Engineering Systems. ILO: Develop and justify a functional design for area development that aligns with your strategy, vision and integrated assessments; |

In Q4

| Course                                    | ILO / description  |
|---|--|
| 202000063 Project Designing Constructions | Part of MAM for M-CEM track Construction and M-CME   |
| 202000747 Project Process Design          | Part of MAM for M-ChE track Chemical and Process Engineering. Requires extra selfstudy course (3 EC) to prepare.   |
| AT M12 Bachelor Assignment                | In principle you can fulfill the design requirement by making a design during your bachelor's assignment. If you indicate this on your course list form, you need to already have contacted a research group/supervisor and discussed concrete plans for a design-focused assignment. These plans should be explained on the course list form. |
