

Research project Data2Game

[Johannes Steinrücke](#) (IST – OMD)

The Data2Game project is a joint project by the University of Twente, Tilburg University, T-Xchange by Thales and the Veiligheidsregio Twente. The projects goal is to develop a digital adaptive serious game for professionals in the crisis management sector in order to be able to train more efficiently and more frequently. Johannes Steinrücke investigates assessment in games based learning, instructional interventions and the effectiveness of the serious game in general.
