

ADDENDUM TO ENROLMENT REGULATIONS 2025-2026: ARTICLE 2.5: TUITION FEES AND PAYMENTS

Adopted by the Executive Board on 5 July 2024

1. This addendum supplements the Enrolment Regulations 2025-2026 as published on <https://www.utwente.nl/en/education/student-services/enrolment/enrolment-regulations/>
2. This addendum was approved by the Executive Board of the University of Twente on 5 July 2024
3. Wherever there is any conflict between this addendum and the Enrolment Regulations, the provisions of the Enrolment Regulations are leading.
4. Notwithstanding any provisions under the Enrolment Regulations, the Executive Board of the University of Twente has decided that Article 2.5.3-2 is altered as follows:

Transitional arrangement for increased institutional rates

From the academic year 2025-2026, there will be increased institutional rates for Master's programs (both Engineering/Science and non-Engineering/Alfa-Gamma) on top of the increased rates of 2023-2024 for Non-Engineering/ Alfa-Gamma Master's. In addition, from the academic year 2023-2024, there are increased institutional rates for Engineering/ Science Bachelor's.

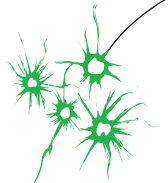

The UT wants to prevent students who already started a Bachelor's or Master's programme prior to the increased rates from having to deal with unexpected extra costs. For that reason, a transitional arrangement was set up for two different groups.:

Students who started a Bachelor's or Master's program prior to 2023-2024

The students in question will pay the former rate including the regular annual increase of €125 (Bachelor's) or €250 (Master's) instead of the increased rate. Students are entitled to the transitional arrangement if they have started an Engineering/ Beta Bachelor's or Non-Engineering/ Alfa-Gamma Master's in study year 2022-2023 or earlier. The transitional arrangement applies until the academic year 2026-2027.

A student is not entitled to the transitional rate if:

- *The student has started in academic year 2022-2023 or earlier with an Engineering/ Beta Bachelor's or Non-Engineering/ Alfa-Gamma Master's and switches to another Bachelor's or Master's programme during or after study year 2025-2026. For the newly chosen programme, the renewed rate will apply.*
- *The student has started in academic year 2022-2023 or earlier with an Engineering/ Beta Bachelor's or Non-Engineering/ Alfa-Gamma Master's, (temporarily) is de-enrolled for this programme and returns during or after study year 2025-2026. For the (newly) chosen programme, the renewed rate will apply.*
- *The student has been admitted for academic year 2022-2023 for an Engineering/ Science Bachelor's or Non-Engineering/ Alfa-Gamma Master's, but decides to start the programme in 2025-2026.*
- *Students who started the foundation year at Twente Pathway College in academic year 2022-2023 and enroll in an Engineering/ Science bachelor's in academic year 2025-2026.*
- *Students has started a Premaster's programme in academic year 2022-2023 or earlier and enroll in a Non-Engineering/ Alfa-Gamma Master's in academic year 2025-2026.*

Students who started a Master's program prior to 2025-2026

The students in question will pay the former rate including the regular annual increase of €250 instead of the increased rate. Students are entitled to the transitional arrangement if they have started a Master's in study year 2024-2025 or earlier. The transitional arrangement applies until the academic year 2027-2028.

A student is not entitled to the transitional rate if:

- *The student has started in academic year 2024-2025 or earlier with a Master's and switches Master's programme during or after study year 2026-2027. For the newly chosen programme, the renewed rate will apply.*
- *The student has started in academic year 2024-2025 or earlier with a Master's, (temporarily) is de-enrolled for this programme and returns during or after study year 2026-2027. For the (newly) chosen programme, the renewed rate will apply.*
- *The student has been admitted for academic year 2024-2025 for a Master's, but decides to start the programme in 2026-2027.*
- *The student has started a Premaster's programme in academic year 2024-2025 or earlier and enroll in a Master's in academic year 2026-2027.*
