#### The Master's exam

Is the MSc final project the part of your master programme that you will complete last?

No Please provide a list of the subjects that still need to be completed, with the expected date of finishing below.

Yes Please note that in accordance with article 7.10, paragraph 2 of the WHW, the

master's final examination is deemed successfully completed if the exams of the units of study of the master's degree programme have been taken successfully. As a rule, the date of the successfully completed exam of the last unit of study is taken as the date of the final examination (graduation date). If so desired (e.g. in case you want to take extra courses before graduating), the student has the right to submit a substantiated request in writing to the Board of Examiners to delay the graduation date and consequently the presentation of the certificate. In this request the student must at least indicate the desired duration of the delay. The student's request should be submitted at least two weeks before the Board of Examiners meeting prior to your graduation date to the Board of Examiners. The application for the MSc colloquium can be handled only after the decision of the Board of

Examiners.

Yes, I will submit a request.

If you have subjects other than your final project that still need to be completed, please provide a list of these subjects with the expected dates of finishing below.

List of subjects still to be done
