

Newsletter Mobility-Online

Welcome all

We are happy to see you back at our Mobility-Online newsletter! The sun is out, temperatures are slowly rising and spring is starting to bloom.

Mobility-Online Workshop

On February 27th, 2025, the first Mobility-Online workshop took place. We want to take this chance to thank our participants, we enjoyed showing you around the system and were happy to learn from you as well with regards to which tips and daily actions are most useful for you.

We know there were quiet a number of colleagues, who would have liked to attend but were unable due to the date or other circumstances. Well, we are happy to announce that there will be another Mobility-Online workshop. So get out your calendars and take note of our Save the Date: Thursday, June 19th 2025.

More information will follow per email at the end of April. A signup link will also be included in said email.

Mobility-Online Interfaces

We are happy to announce that the interface with the renewed travel insurance application has been established and is working properly.

Next, the interface with JOIN will be developed as part of the DSD project. As the development progresses, we will keep you updated.

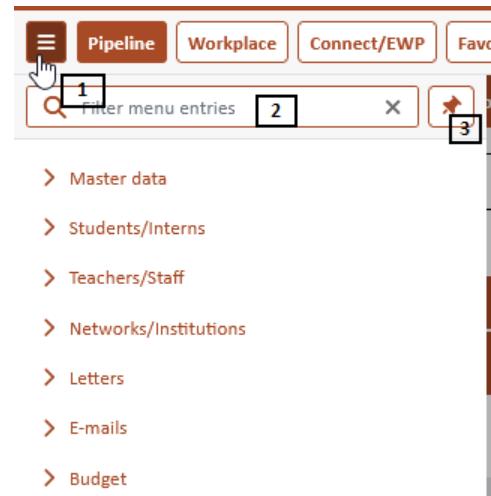

New Pipeline Layout

Dutch version below

Below we shortly explain what changes you can expect from the new pipeline layout. You can also find this information on our website, as one of the FAQs. For those who prefer a Dutch explanation, we have added it at the end of this newsletter.

Some features have been added to increase the user-friendliness of the system. The screenshots below have been taken from the test environment, which is the reason the main colour scheme is in brown. The production environment is still in the colour scheme you are used to, no worries there.

The menu is now collapsable (1), thus making your screen cleaner and giving you more space to view the pipeline. You can search within the menu (2) and should you prefer to have the menu visible at all times you can click on the icon to the very right (3) to pin it in place.

The screenshot shows the top navigation bar of the Mobility-Online Pipeline interface. It includes tabs for Pipeline, Workplace, Connect/EWP, and Favo. Below the tabs is a search bar with the placeholder "Filter menu entries" and a magnifying glass icon. To the left of the search bar is a button with a list icon and the number 1, indicating a collapsed menu. To the right of the search bar are two buttons: a square with the number 2 and a square with a pin icon, both associated with the pinned menu feature. The main content area displays a list of menu items under the heading "Master data":
Master data
Students/Interns
Teachers/Staff
Networks/Institutions
Letters
E-mails
Budget

As you can see below, all lines have become tighter. The link to open all steps at once has been moved to the right. The same is true for the icon to view all applications at once regardless of the step they are in.

Courses abroad

— 2025/2026

+ Before the mobility - Application form

+ Before the mobility - Proposal Form

+ Before the mobility - Scholarship questions

[Open all sub groups Total \(41\)](#)

Within the sub-categories the icons indicating new applications in a step have become a little smaller, yet the question mark icon has become more visible on the line.

— Before the mobility - Application form

+ New application - check application form

+ Check application and send confirmation e-mail to student

— Before the mobility - Proposal Form

+ Confirmation e-mail was sent - The host institution has not been allocated yet

+ Host institution has been allocated - Institution not yet accepted/rejected by the student

+ Institution accepted by the student - Student not yet nominated to host institution

Allocate the institution selected by the lot

Display applications

Confirm nomination of student to host institution

Wat houdt de nieuwe pipeline layout nu precies in en wat kunnen jullie ervan verwachten?

Er zijn features om de gebruiksvriendelijkheid te verbeteren. De afbeeldingen zijn van de testomgeving, daarom zijn de algemene achtergrondkleuren bruin, in de productieomgeving is alles nog steeds in het kleurenschema dat jullie gewend zijn. 😊

Het menu is nu inklaapbaar (1), waardoor je scherm overzichtelijker wordt en je meer ruimte overhoudt voor de pipeline zelf. Jullie kunnen binnen het menu zoeken (2) en mocht je het prettiger vinden om het menu toch altijd uitgeklapt te hebben, kun je op het icoontje helemaal rechts (3) klikken.

1 Filter menu entries

2

3

- > Master data
- > Students/Interns
- > Teachers/Staff
- > Networks/Institutions
- > Letters
- > E-mails
- > Budget

Zoals jullie hieronder kunnen zien, is alles iets strakker geworden. De link om alle stappen in één keer uit te vouwen is verplaatst naar rechts, net als de mogelijkheid om alle applicaties te bekijken ongeacht in welke stap deze staan.
