## Programme Elective courses Applied Physics 2016/2017

The curriculum of Applied Physics contains 20 EC elective courses. The elective courses can be compulsory track courses or chair specific courses of another research group or track, listed in the Applied Physics Master Programme. The elective courses can be courses of other departments (see website of this department) or extra courses given by Applied Physics listed below. The curriculum of Applied Physics contains for every research group a list of recommended elective courses. The recommended courses of other departments are also listed below.

Capita Selecta courses are used for activities done in the chair not belonging to regular courses. The content, form and size is in agreement with the chair. There is a special registration form (see APH site – Education > Forms APH) where beside course code, name, and EC, the subject, the material used, the assessment and a title is registered. The title is visible on the certificate supplement.
