

Advanced Technology

Registration form for Participation in large multidisciplinary project

Please submit this form to BOZ-AT

Course code : 201600186

Title of the course : AT Participation in large multidisciplinary project

Description of the course: Advanced Technology professionals are essential for large multidisciplinary projects, such as the Green team, Solar Challenge or the Robot soccer team projects. At the university these projects are performed and organized by students. Advanced Technology professionals are part of these teams and use their knowledge of electronics, control, system design, circuits, communication systems and signal theory in these projects. In case the tasks of individual students is deepening the advanced technology aspects of the project, this work can be done within this module in the bachelor program.
