SUBJECT
Teaching- and Examination Regulations (OER) B-AM 2017-2018

The PC-AM gives a positive advice for the Bachelor TER 2017. For this advice we have considered the following issues:

- The coherence of the modules, except the fifth, is described sufficiently and well motivated. A motivation for the final two modules should be added.
- It is good to add a final qualification to account for the Minor. The text we suggest is: "The student can shape his/her learning process, his/her competencies and develop his/her professional identity, by consciously choosing, motivating and completing study units that match personal capacities, skills, and motivation".
- We have noticed that some OSIRIS codes have changed. It would be better if the PC is notified as well. A course code change may involve minor changes only, but this is not automatically true.

Kind regards,

Hil Meijer,
chair Programme Committee AM
