SUBJECT  
Advice on the Bachelor Assignment

We recommend to extend the pilot to perform the actual bachelor assignment during the fall (rather than spring). We would like to see a proposal to regulate this for 2019-2020 in the TER next academic year.

Regarding the individual assessment of students, we agree with the proposal that it should be clear that every student is to write his/her own report as well as create a poster and pitch it. If an assignment can be assigned to multiple students, the description should include a statement how the work may be divided without too much overlap.

Kind regards,

Hil Meijer,  
chair Programme Committee AM
