SUBJECT
Advice on changes in Module 5

We have reviewed the changes in the course description for Module 5 Statistics and Analysis.
We give a positive advice about the changes noting that

1. The 9th learning goal (statistics literature) was deleted, but was still present in the description of the module.
2. The content refers to module 3 for Probability Theory but as that was shifted it may be wiser to refer to that module by name and/or code (and not by time).

We also note this implies a small change for the bachelor TER as students of earlier cohorts can no longer follow the 5+3 but only the 6+2 variant.

Kind regards,

Hil Meijer,
chair Programme Committee AM
