SUBJECT
Advice concerning the course Simultaneous Statistical Inference

Dear Programme Director,

We have discussed the description of the elective course Simultaneous Statistical Inference for module 11. For the content description, we have a comment regarding the entry requirements, i.e., about "Moreover, basic knowledge of R is required". As the current prospective students might not all have some experience with R, we suggest to change "required" to "recommended".

Other than that, we are happy with the description and recommend the proposed course.

Best regards,

Hil Meijer,
Chair PC-AM
