SUBJECT
Advice on relaxing BSA norms

Dear Programme Director,

The PC-AM has been informed about the relaxation of several rules regarding the BSA for as long as the current Covid19 situation continues, but at least for the academic year 2020-2021.

The proposal to have a positive BSA with only 40 EC instead of 45 EC should relieve some stress and address motivational factors. We agree with the proposal of the PD that this relaxation cannot stretch too far, and that a student still needs to pass certain courses such as Analysis I and Linear Structures as we believe these to be essential indicators of future study success.

We therefore agree to adopt this policy.

Best regards,

Hil Meijer,
Chair PC-AM
