SUBJECT  
Course proposal Capita Selecta

Dear Programme Director,

Generally speaking, we appreciate the layout for the new MSc course Capita Selecta. We remark though that the description to be put into OSIRIS is far from attractive nor enlightening.

We have a few suggestions for the form.

- At the top change Name to Student Name, and fill in the course code
- Clarify the number of ECs a student can get, and how that works.
- The procedure and timeline can be clarified. We think it is important for a student to realise that this form should be approved by the examination board before they start. Otherwise, disappointments are likely.
- The form currently lists a motivation which is the "why", while the content is less clear apart from learning goals. We suggest adding a field "title" with examples such as "Capita Selecta on the spectral theory of unbounded operators" or "Capita Selecta on martingales". This provides focus for setting up the form and judging by the examination board.

We would like to see the updated form, but if the form is updated according to our suggestions, we approve this new course.

Best regards,

Hil Meijer  
Chair PC-AM
