SUBJECT
Book Linear Optimisation

Students in general are satisfied with the course Linear Optimisation (module 2). They indicate, however, that the book is not adequate. The intended entry level of the book is far beyond that of a beginning bachelor student. In addition it is mentioned that a clear match between the books' material and the exercises is absent. As this has been a recurrent remark, we advise to adopt a new book or other material.

Kind regards,

Hil Meijer,
chair Programme Committee AM
