

EE-BSc – Meeting for the Elective module 7

Cora Salm– EE program director

Content

- Welcome
- Don't forget to fill in the NSE
- Minors
- Module 7A/7B
 - Device Physics
 - Network Systems

ELECTRICAL ENGINEERING: EVALUATIONS

There are many, many, many evaluations

SEQ after each module

EQC/PC lunches

Module evaluations

NSE

Each evaluation has its own task.

Problems with a module/course:

OKC – OLD

SEQ

or just .. go to the Studi of Scintilla (they'll contact EQC/PC/PD.....)

ELECTRICAL ENGINEERING: EVALUATIONS

The goal of all these evaluations:

Improve the study

Make you as valuable as possible

Make it a really great education

(M1 Matlab changed)

(M2 material)

(Mx labs)

(First year pilot alternative academic year)

(M8 change in the signal processing courses) (M11 next year)

M5 changes being made for next year

.....

...

ELECTRICAL ENGINEERING: EVALUATIONS

National Student Enquete (NSE)

- The scope of this evaluation is for your **entire student experience** at the EE program at the UT.
- So, **not meant** for helping us improving the modules or complaints about specific parts of the module (that is Studi/OLK/OLC/SEQ!)

The NSE is used for various score lists in the Netherlands (for instance the Elsevier Keuzegids)

NSE National Student Survey

- Share your opinion (open from today/tomorrow)
- Invitation send by email

Cora will bake/buy cake for all EE students when the reponse rate of EE is the highest in campus

Please only respond to those questions that are relevant to our EE program. If you choose the “middle option” it counts for the average, when you cross out “not applicable” or ‘no opinion” it does not.

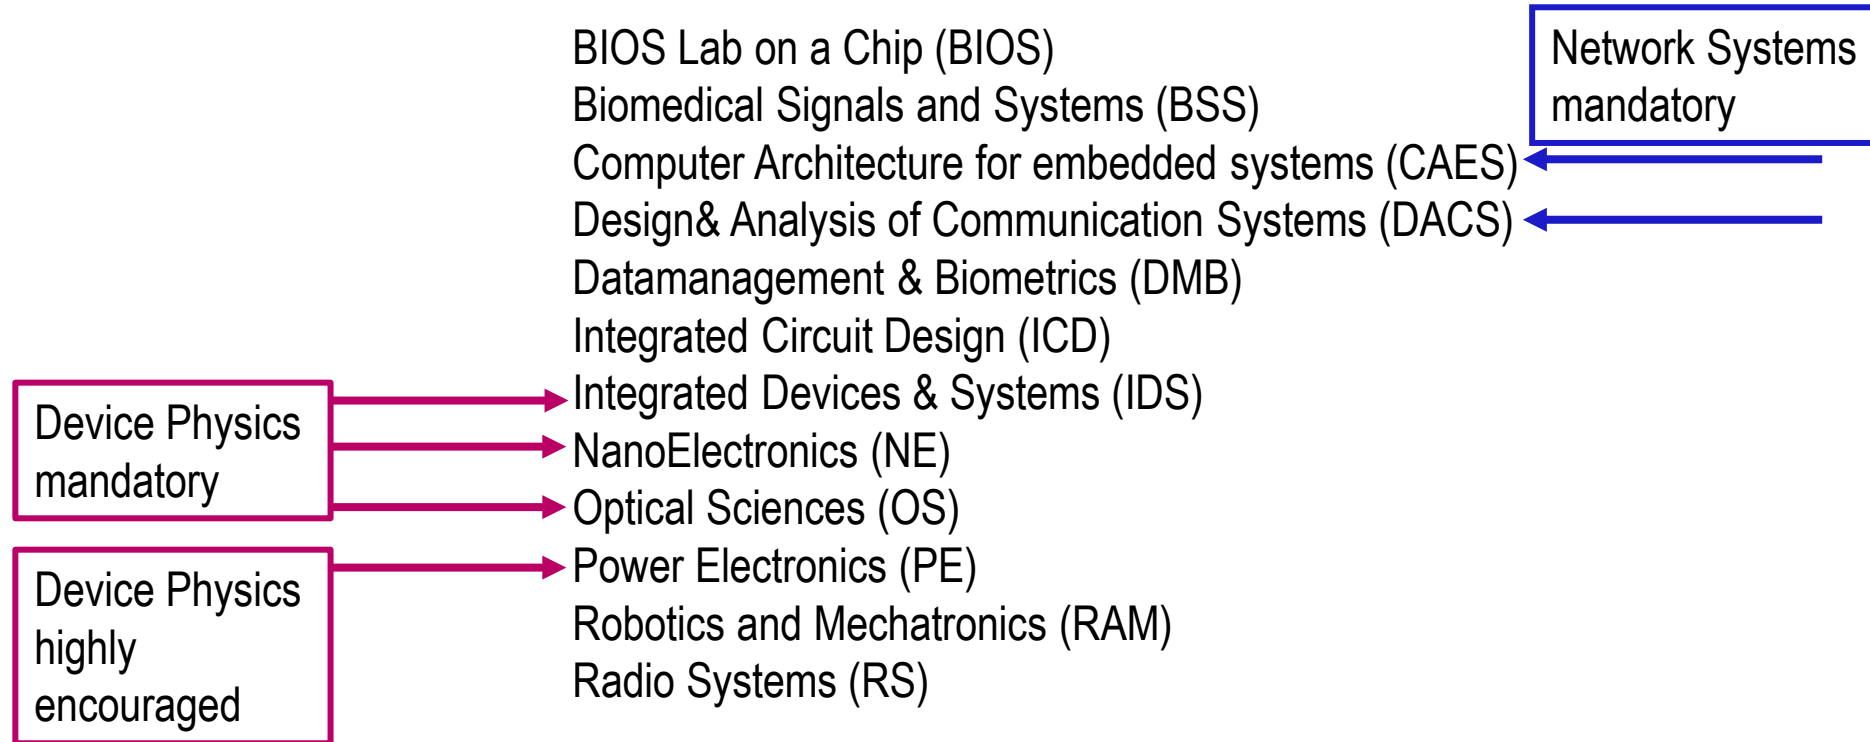

Electives in 3rd year

- Minor Fair: march 2024
 - ① Studying abroad;
 - ② Broadening modules;
 - HTHT modules
 - Learning to Teach, Crossing Borders and Governance of Studentorganisations Module
 - ③ Modules from another bachelor's programmes
 - ④ EE Deepening modules (maximum 1*15 EC)
We will plan another information session about the EE deepening modules

Note: we will also give extra info on minor specific things , not only about the deepening EE minors.

Does choice Module 7A/B impact BSc assignment?

All others NO preference

Please note that your BSc diploma makes you eligible to the EE master. For the master gaps in pre-knowledge will be repaired in the master so your M7 choice has no impact there!

What if you need to repeat part of M3/M4?

- Check what you need to follow!
 - Especially people with an extended BSA
 - Module 7A and 7B are both full-time. Following parts of it is possible, but check beforehand!
 - Don't know what to do? → Study adviser
- Avoid doing more than 15 EC
 - History has shown us that this results in less EC obtained than if you focus on less courses at a time
 - Still want to do more than 18 EC → EER": "*need permission from Jorien*" (with studyplan)
- First year courses first:
 - Otherwise no minor next year
