CELT's mission

- ❖ We support all people with an active role in UT education to (re)design and execute the best possible education for all UT students.
- ❖ We focus on curriculum development, teacher professionalization, and quality enhancement, all in the broadest sense.
- ❖ We do this by courses, advice and tools; for individuals and for groups; pro-active and demand driven; always expertise-based.

Curriculum Development

We support teachers and programme directors with (re)design of their course, module or even a complete programme. Several of our educational consultants are seconded to the five faculties of the university, and are thus able to work in close cooperation with the teachers. We give advice, supply tools, co-design education and help with the evaluation. In addition we offer several courses on module design, course design, Student Driven Learning (SDL) and project led education (PLE).

Teacher Professionalisation

Besides individual coaching and advice, CELT also offers a broad array activities for teacher professionalisation. This can be a single course on a specific topic, or a full programme leading to a special certificate.

- **UTQ:** The University Teacher Qualification, the basic qualification for all teachers at the UT. In the UTQ the teacher develops the necessary competences on design of education, teaching and supervising, testing and assessment, evaluation and professionalisation. The programme leads to a nationally recognized certificate.
- **SUTQ:** For teachers who want to enhance their educational expertise and want to further improve their own courses, we offer the Senior University Teaching Qualification. Peer review, evidence informed, project based and student driven learning are basic principles of the SUTQ approach.
- **Taste of Teaching:** For PhD's with a role in education we offer a special introductory course on the basics of design and delivery of education.

Quality Enhancement

Quality of university education is a highly important theme. It is also complex and rather elusive. CELT supports all faculties of the UT in all aspects of quality enhancement of the different programmes.

- **QUEST:** The Quality Enhancement Support Team provides questionnaire survey services. We support programmes in evaluating their education by means of the Student Experience Questionnaire, a standard list of questions for students.
- **SEQ:** The Senior Examination Qualification is an intensive programme for people with a responsibility in the safeguarding and enhancement of the quality of testing and assessment, like programme managers, members of the Examination Board and Quality Assurance Officers.
- **Trainings:** We supply customised trainings for Programme Committees and Examination Boards for professionalisation. Topics can include explanation of the WHW (Law on Higher Education), formal status of the committee or board, cooperation with other parties, own way of working etc.
- **Accreditation:** CELT offers support to programmes in the process of (re)accreditation. This can be in the form of a mock-accreditation, support in writing the self evaluation report, organising teacher meetings etc.

Other expertise

CELT also offers other expertise in relation to education:

- **TELT - Technology Enhanced Learning and Teaching,** innovation and advice on how to improve education with ICT.
- **Internationalisation** – advice and support with internationalizing the curriculum, like trainings on the international classroom and cultural awareness.
- **Policy Support** – in close cooperation with other UT departments like HR and S&P we contribute to UT policies on e.g. teacher professionalization, testing and assessment, curriculum innovation, institutional audit etc.
