

# ENERGY MANAGEMENT IN SMALL- AND MEDIUM-SCALE INDUSTRIES

## with focus on preparing for ISO 50001 Energy Management

An international course for the public and private sectors involved in energy efficiency and environmental protection in industries.

**9 September – 13 December 2019**

### INTRODUCTION

There will be a focus on energy management tools to improve energy efficiency and to create cleaner production, emphasizing that these improvements provide a win-win situation for SMIs as well as helping countries contribute to the Sustainable Energy for All Goal on Energy Efficiency and the Sustainable Energy Development Goals. In particular there is a focus on preparing for reaching the new International Standard on Energy Management (ISO 50001).

### TARGET GROUP

Management staff involved in energy planning in their industries. Policymakers from government organizations, industrial associations, and institutes involved in industrial development. Consultants who work in areas related to the themes of the course.

### OBJECTIVES

The short-term objectives are to provide the participants with practical tools, knowledge and insights into:

- General problems with energy efficiency within SMIs and possibilities to improvement through energy management.
- The link between energy management and cleaner production.
- The key elements of an energy management system
- Preparation and execution of energy audits
- Preparation for reaching ISO 50001 Energy Management
- Policies and instruments to support energy efficiency improvements in SMIs

The long term objectives are to provide the participants from government, branch and SMIs with management capabilities for SMIs in emerging economies with respect to:

- The efficient use of energy in SMIs
- The reduction of emissions caused by industrial processes
- Policy options and strategies for energy management in SMIs and reaching the SEforAll goal on energy efficiency plus the SDGs.
- Implementing ISO 50001

### ORGANIZATION

The course is divided into two parts. Part 1 is a 5 module online course spread out over 10 weeks in which participants, in their own time, participate in Webinars and on-line forums, undertake reading assignments, watch short videos, listen to presentations and complete short quizzes and written assignments. It is estimated that to complete the material participants will need 8 hours per week. All modules of Part 1 must be successfully completed before the start of Part 2 – the two week residential course. Part 2 consists of an assignment in which participants work in groups on an energy audit in a real situation (in 2017 this was in a factory of an international tire company), that forms the basis of a plan to reach ISO 50001. This component is supported by lectures, including guest lectures by leading specialists, presentations, case studies, audits, discussions, and a site visit.

### HISTORY OF THE COURSE

The University of Twente has been offering the annually training courses on energy management and cleaner production in small and medium scale industries since 1987.

Since 2017 we have substantially revised the delivery of the programme including an element of the teaching through five online modules spread over a 10-week period followed by a 2-week residential programme.

We have teamed up with UNEP DTU Partnership and UNIDO to deliver our programme.

### CONTENTS

**Module 1:** Motivation for Energy Management

**Module 2:** Introducing the Energy Management System

**Module 3:** Energy Policy

**Module 4:** The Energy Manager and the Energy Team

**Module 5:** Introduction to ISO50001

**Module 6:** Practical steps towards achieving ISO Standard 50001

## GENERAL INFORMATION

**Venue** – Online through The University of Twente’s Website (9 September – 13 December 2019) 2 weeks residential in Leeuwarden, the Netherlands (end November/beginning December 2019).

**Entrance Requirements** – BSc, MSc or equivalent from a recognized university, at least two years of professional experience, and a basic understanding of engineering and economics is necessary. The language requirement is IELTS 6.0 (or equivalent). For the online component participants must have access to an appropriate internet connection.

**Tuition fees** – 3000 Euro

**Living expenses** – Estimated total costs for two weeks are 1150 Euro which covers accommodation, food, out-of-pocket expenses, and Insurance (Medical and Third Party Liability).

**Accommodation** – The course organizers will arrange accommodation for the residential part of the course.

**Insurance requirements** – Attendees must be covered by Health, Accident and Third Party Liability Insurance from the date of arrival in the Netherlands. The course organizers will make the necessary arrangements.

**Facilities** – During the residential part of the course, participants will have access to the UT library and an internet connection. Course materials are provided electronically. Participants are expected to bring their own laptop.

**Fellowships** – Our 2019 short courses have been approved by the Nuffic OKP short course list. If you are admitted to our course you can apply for an OKP fellowship at [www.nuffic.nl/okp](http://www.nuffic.nl/okp)  
The NFP fellowship application deadline for this course is **4 April 2019**.

**Cancellations** – An administration fee of 500 Euro will be charged for all cancellations not notified at least 30 days prior to the course start date.

Here is the verdict of two past participants of EMSI on what the course has done for them:

*“The industry audit gave me the opportunity to practically implement what was taught during the course.”*

*“I learnt new technical skills to supplement the services I can offer as a consultant. After conducting some more energy audits I will be able to qualify for licensing as a certified energy auditor”.*

## FURTHER INFORMATION AND HOW TO APPLY

**Online application form:** [www.utwente.nl/bms/cstm/education/emsi](http://www.utwente.nl/bms/cstm/education/emsi)

**Online tool for Nuffic scholarships is open from 7 February until 4 April 2019.**

If you intend to apply for a NUFFIC scholarship we need to have received your application form by March 25<sup>th</sup> to ensure we can process it in time.

Deadline for self-funded applications is .

Places are limited and selective. Apply early to avoid disappointment.

For questions you can contact our course administration:

**Mrs Barbera van Dalm**
