Role of Identity

Work in progress

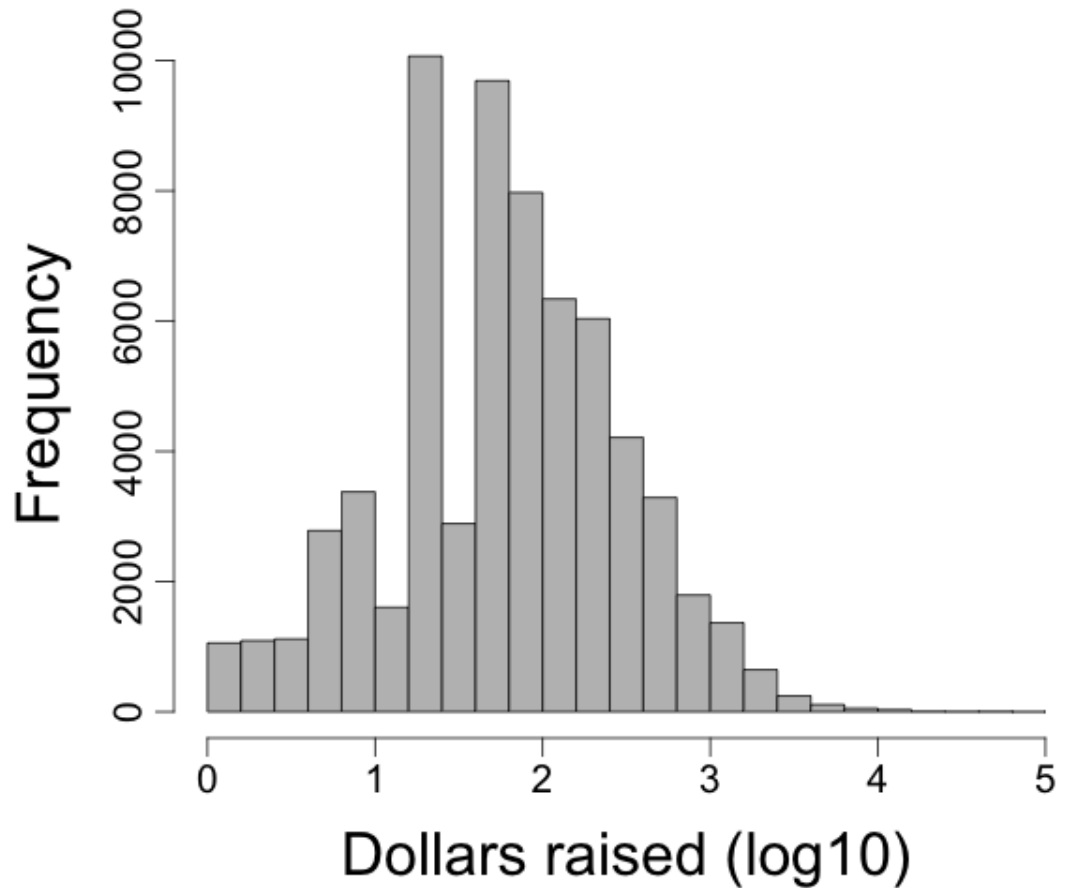

- Impact of tweets and offline fundraising events on fundraising performance
- Multilevel study in US counties (linking data about ratio prostate and testicular cancer)
- Motivation of campaign members over time
- The effectiveness of Movember teams and their leaders

Identifying Motivations to Participate in Online Health Campaigns

D. Nguyen, T. van den Broek, C. Hauff, D. Hiemstra and M. Ehrenhard: #SupportTheCause: Identifying Motivations to Participate in Online Health Campaigns at EMNLP 2015.

166,422 US
participants in
100,615 raised
no money

Knowing individual motivations helps to explain the amount of campaign donations raised by participants

Social Identity Model of Collective Action (van Zomeren et al., 2008)

- **Injustice:** A shared emotion that includes both affective (e.g., anger) and cognitive perceptions (ideology) of an unfair situation

Social Identity Model of Collective Action (van Zomeren et al., 2008)

- **Injustice:** A shared emotion that includes both affective (e.g., anger) and cognitive perceptions (ideology) of an unfair situation

“I had testicular cancer”

“my dad”

“because men’s health is important to me”

Social Identity Model of Collective Action (van Zomeren et al., 2008)

- **Injustice:** A shared emotion that includes both affective (e.g., anger) and cognitive perceptions (ideology) of an unfair situation
- **Social identity:** A sense of belonging together that emerges out of common attributes, experiences and external labels

Social Identity Model of Collective Action (van Zomeren et al., 2008)

- **Injustice:** A shared emotion that includes both affective (e.g., anger) and cognitive perceptions (ideology) of an unfair situation
- **Social identity:** A sense of belonging together that emerges out of common attributes, experiences and external labels

“my friends asked me again to join them”

“a great excuse to grow a stache”

Social Identity Model of Collective Action (van Zomeren et al., 2008)

- **Injustice:** A shared emotion that includes both affective (e.g., anger) and cognitive perceptions (ideology) of an unfair situation
- **Social identity:** A sense of belonging together that emerges out of common attributes, experiences and external labels
- **Collective efficacy:** The shared belief that ones group is capable of resolving its grievances through a campaign

Social Identity Model of Collective Action (van Zomeren et al., 2008)

- **Injustice:** A shared emotion that includes both affective (e.g., anger) and cognitive perceptions (ideology) of an unfair situation
- **Social identity:** A sense of belonging together that emerges out of common attributes, experiences and external labels
- **Collective efficacy:** The shared belief that ones group is capable of resolving its grievances through a campaign

“this campaign can make a difference!”

Nick Wheeler

My Motivation

Because I have just turned 50 and have become aware how many people this disease affects. Selling shirts is not enough. It is more important to beat this terrible cancer.

- Nick Wheeler

FIRST YEAR MO!

Linking profiles

John Stewart (@johnstewart2) · 30 Nov 2015

Last day of Movember today. Still time to donate to my **mospace** at mobro.co/johnstewart2 #Movember #Mobro

In total 5,519 users linked. 2,108 were manually annotated for their motivation.

Dataset statistics

	Train	Test
# Participants	1,494	614
% US / UK	54.8/45.2	53.3/46.7
% Injustice	37.6	40.2
% Social identity	48.7	46.9
% Collective efficacy	36.1	35.0

Annotation agreement

	Cohen's Kappa
Injustice	0.71
Social identity	0.67
Collective efficacy	0.47

Based on 200 double annotations

Automatic classification of Movember profiles

- Logistic Regression
- Unigrams, bigrams, topics, text length, country

	F1
Injustice	0.816
Social Identity	0.788
Collective efficacy	0.627

Final system

Feature analysis

Injustice	Social Identity	Collective Efficacy
LDA topic ^a	fun	LDA topic ^b
cancer	team	beat
friend	moustache	and family
lost	mo	change
father	grow	yourself
had	mustache	all of
survivor	LDA topic ^c	awareness
prostrate	fuzz	for movember
for my	movement	awareness of
my	look	last

Table 4: Top-weighted features for free-text motivation experiments.

^atopic about family/friends who had cancer

^btopic about raising funds for research

^ctopic about the Movember campaign

Automatic classification of Twitter profiles

- Logistic regression
- Unigrams, bigrams, topics, text length, country, behavior, urls, user mentions,...

Low performance, **why?**

- Few tweets per user
- Nature of Twitter influences content

	F1
Injustice	0.458
Social Identity	0.531
Collective efficacy	0.399

Final system

Findings

- Campaign participants with an **injustice** motivation raise significantly ($p < 0.001$) more money
- Participants that are part of a **team** raise significantly more money ($p < 0.001$)
- Participants with a **social identity** motivation are more often part of a team

	Injustice	Identity	Efficacy
UK (\$)	203.74	128.36	123.39
US (\$)	234.47	156.07	169.03

n=90,484

Summary

- Explored machine learning methods to automatically identify the motivations of Movember participants
- We found a strong link between motivations and donations, and motivations and team membership

Thank you!
