

Instruction how to implement the new Samsung SSD T3 firmware

Steps to take:

1. **Make a backup of your Samsung SSD drive data;**
2. Browse to: <https://www.samsung.com/semiconductor/minisite/ssd/download/portable/>
3. Scroll down to section “**T3**” and click on “**Portable SSD Activation Software(2)**”;
4. Download and run the file called “**Activation Software for Windows OS**”;
NOTE: the Software available for **MAC** does not update the drive, visit the update sessions in Ravelijn/Cubicus.
5. Run this software (you need admin rights for this).

You will see a blue Window like the one below, click on “**More info**”

6. Now click on **“Run anyway”** (it’s safe);

7. if you see a screen that says “Do you want to Allow this app to make changes to your device” click on **“YES”** accept the agreement and click **“Next”** when done click **“Finish”**

8. Click **“Yes”** on the following screen;

9. Press **“Next”** in the following 2 screens and **“Finish”** in the last one;

10. Connect your Samsung T3 SSD drive to a USB port, you will see the following similar screens:
In the first screen enter your password and click on **“UNLOCK”** :

11. Click on button **“Settings”** make sure the Security Mode is set to **“OFF”** (Needed for the Firmware update). Now **“Enter your current password”** and click on **“Save”** to continue;

12. Now click on button **“UPDATE”** to implement the new firmware to version 1.6.2;

13. When done, click on the name of your SSD drive, in this case it the blue Highlighted text: **Samsung T3** ,
 - Make sure that in “**SETTINGS**” the Security Mode back to “**ON**”
 - Now create a new password (do not forget your password !!);
14. Now you’re Samsung T3 SSD drive is fully updated and secure.

Click on the “**X**” in the upper right corner to close the screen. The next time you hook up your Samsung SSD T3 to your system just enter your password and start working.
