

Advice PC IEMs/IEM

The PC has advised the training management to separate the Skills and Project subassemblies in the BSc modules, as the former are assessed individually and the latter have a group assessment. The training management agrees with this, and has promised to tackle this in the coming year. There is also a proposal for the improvement of the Skills line. This can no longer be achieved for the forthcoming OER. With this commitment and improvement plans for next year, the PC agrees with the proposed OER.

Questions have been raised by the PC about the BSA regulation for IEMs. These were removed from the PC meeting following clarifications by the OLD.

There are several textual comments (ambiguities and grammatical errors) collected by the OWC (Bernadette Pol) from the PC members. We trust that these will be incorporated into the new OER in the best possible way.

In summary, the IEMs/IEM PC agrees with OER 2018-19.
