1	Introduction	1
1.1	Challenges in health care delivery	1
1.2	Hierarchical decision making and operations research . .	5
1.3	Thesis structure	7
1.4	Applied research environment	9
1.5	Summary of content	10
2	Survey of literature	17
2.1	Introduction	17
2.2	Defining holistic models	19
2.3	Common model scopes	20
2.4	Discussion	35
3	Patient mix optimization	39
3.1	Introduction	39
3.2	Model description	42
3.3	Approximate solution approach	48
3.4	Application and evaluation of ASA	57
3.5	Discussion	65
4	Efficiency evaluation for pooling resources	67
4.1	Introduction	67
4.2	Model description	72
4.3	Approximation	77
4.4	Numeric experiments	82

4.5	Implications for practice	90
4.6	Application	91
4.7	Discussion	99
5	Panel sizing in oncology	101
5.1	Introduction	101
5.2	Model description	105
5.3	Queueing network models	110
5.4	Application	119
5.5	Discussion	125
5.6	Appendix	127
6	Surgical scheduling and inpatient wards	131
6.1	Introduction	131
6.2	Model description	134
6.3	Application	145
6.4	Commercial software	150
6.5	Discussion	152
7	Pharmacy policies to reduce waiting times	155
7.1	Introduction	155
7.2	Model description	158
7.3	Patient waiting times	162
7.4	Cost of wasted medicine	169
7.5	Application	172
7.6	Discussion	174
8	Conclusion and outlook	177
	Bibliography	181
	List of abbreviations	201
	Summary	203
	Acknowledgements	207
