

Hello there! My name is Huub Stroet, I am a second year International Business Administration student and last year I was the commissioner of Educational Affairs of Study Association Stress. This academic year I have been a member of the Faculty Council, and I would like to put my experiences from this year to good use as a member of the Faculty Council next year!

By combining the experiences from my board year on several levels of the faculty with the new insights I gained in the Faculty Council this year, I was able to achieve a high level of understanding of the implications that important plans of the Faculty Board have on you, the students. By using that understanding to critically judge plans that were presented to us, we managed to provide constructive feedback to improve the position of students within BMS! To make sure that knowledge does not go to waste, I put myself up for election once again!

With the five of us, we want to make a difference by using the knowledge and experience related to educational and organisational processes that we gained in our board year. A board year where we actively contributed to achieving changes in educational procedures to make sure students are better represented in influential advisory bodies throughout our entire faculty. On top of this, the understanding that we built up of the way our faculty is organised now, made us realise that we as students can and have to act to further improve the current status of student involvement.

Vote for better student involvement, vote for List Stress!

Kind regards,

Huub Stroet
