

Hello there! My name is Jelle van Pijkeren, I am a third year Industrial Engineering & Management student and at the moment I am the chairman of Study Association Stress. Next year I would like to be a member of the Faculty Council!

During my board year I got in contact with a lot of other students, study associations and staff to talk about the needs of students. In my role as chairman I was occupied with strategic decisions and discussions, which are always, directly or indirectly, influencing the wellbeing of students. In my board year, my board members and I worked very hard to organise activities and services to the benefit of our students. For the coming year I want to continue doing this and all the experiences of the last year will help me to be a good representative for you, the BMS students!

With the five of us, we want to make a difference by using the knowledge and experience related to educational and organisational processes that we gained in our board year. A board year where we actively contributed to achieving changes in educational procedures to make sure students are better represented in influential advisory bodies throughout our entire faculty. On top of this, the understanding that we built up of the way our faculty is organised now, made us realise that we as students can and have to act to further improve the current status of student involvement.

Vote for better student involvement, vote for List Stress!

With kind regards,

Jelle van Pijkeren
