

Hey everybody!

Being highly involved in various University matters through my job as a student assistant, my board years at my Study Association Communiqué and two umbrella boards, as well as activism in the Programme Committee, the Unicef Studentteam, Connecting Hands and other associations, I realized: I want to be a student with a voice! As a Communication Science student, I feel the natural need to see improvements in decision making processes and development of opportunities. In one way or another I have previously worked with every member on the BMS United list. Having seen their capabilities to bring advancement, I put my full trust in them to represent my voice in the council, if I will not be able to fulfill that purpose myself.

With the seven of us, we want to make a difference by using the knowledge and experience related to educational and organisational processes that we gained during our board years. Our different backgrounds unite expertise, diverse experiences and interests in one enthusiastic team. We actively contributed to achieving changes in educational procedures to make sure students are better represented in influential advisory bodies throughout our entire faculty. On top of this, the understanding that we built up of the way our faculty is organised now, made us realise that we as students can and have to act to further improve the current status of student involvement.
