

Hey, I'm Laura and currently I'm finishing my bachelor MS&T. Upcoming year, I will start the master program Public Administration. On top of that, I would like to be a part of our faculty council. Why should you vote for me? I'll explain!

Being connected to policy is very important to me. That can be seen in the following ways: my study program is full of policy related aspects, through my board year I came into contact with the practical aspects of policy and, regarding UT policies, my term in the University Council has given me affiliation with UT policy content-wise. My affiliation with policy is through and through. This academic year I have gotten familiar with UT policy and her way of operating. I have seen how policies come into existence in the UT community, and next year I would like to focus on the practical implementation of these policies.

Moreover, I feel that I have established the right contacts within the UT, which enable me to get the most out of this position and actually realizing change for us, the only non-technical faculty in this technical oriented university.

Finally, as a part of DAS, there is strong and frequent communication between the different levels of participation in which DAS is active, from OLC's all the way up to the University Council and even the University Committee of Education. This allows for strong collaboration between the different levels of participation, which strengthens the voice of us students within the UT!
