

Hi,

My name is Jasper Lucassen and I have enthusiastically signed myself up as an candidate for the faculty council of BMS.

I am the proud father of two amazing girls and one, recently born, boy. I live in Borne together with my wife and kids. Last year October I've started working for the University of Twente as an project controller. After working for a commercial company for many years I must say I truly love working in my current position. The diversity of not only the activities of my job but also all the different types of people and positions around me is what makes working for the University interesting and fun. As a person I love to take moments to amaze myself with all that is happening within the University and therefore also the faculty BMS. It challenges me to always look for ways to improve and create togetherness to set changes in motion.

Of course being part of the faculty council is a wonderful way for me to set the first step to get in touch with a lot of processes and people with whom I am unfamiliar with at this point. This makes it very educational for me. But I also believe I can bring a lot to the table by looking at things in a critical manner but also being very open-minded. I would love to talk about where we want to go with BMS and how we can accomplish this.

Thank you!
