

My name is Jeroen Assink, third year Industrial Engineering and Management Student. My interests lie with the strategy and vision of large organizations. In the academic year 2020-2021, I was chairman of S.A. Stress, and in this year I have gained an immense amount of knowledge about the university, but I also found out that there is still much more to learn. The University of Twente provides students with the possibility of working together to achieve great things, and I believe we as students should take that opportunity to actively contribute to our university. Together with BMS United, I will give it my all to make sure that the faculty learns, understands, and integrates the ideas of students in their plans. I am looking forward to working together with the faculty.

With the ten of us, we want to make a difference by using the knowledge and experience related to educational and organisational processes that we gained during our board years. Our different backgrounds unite expertise, diverse experiences and interests in one enthusiastic team. We actively contributed to achieving changes in educational procedures to make sure students are better represented in influential advisory bodies throughout our entire faculty. On top of this, the understanding that we built up of the way our faculty is organised now, made us realise that we as students can and have to act to further improve the current status of student involvement.

Vote for better student involvement, vote for list BMS United!
