

Hi! My name is Dagmar Franken and currently, I am in the first year of my master Industrial Engineering and Management. This year, I am on the list of UReka for the BMS Faculty Council! Throughout the past years, I have seen different sides of the UT in my various positions within different organisations. One thing I value much within the UT is that students are represented within the UT at different levels and may think along about policy while aligning the wishes of the UT, staff, and students. I hope to be part of the Faculty Council next year to represent the students within BMS and, together with UReka, make sure that the voices of the students are heard!
