

Motivational Letter Tijani Nagra

My name is Tijani Nagra and I am a third-year Psychology BSc student. Since my second year, I am active at my study association S.V. Dimensie and this year, I am doing a Board year as the Chairman of the association. I am in constant exchange with different parties and have a great interest in solving problems and seeing in which direction the program develops. Furthermore, I have a big network of Psychology students that share with me their complaints about the current shortcomings of the program or possible improvements in the future. I also hold the function of Vice-Commissioner of Educational Affairs and am in the loop if it comes to decisions of the program management. With the network I build up, it offers me a big opportunity to consider various stakeholders and possibly improve things, or to critically look at possible changes and the implications on everyone. I am looking forward to working together with the faculty next year to represent students in the discussions and ensure that their perspectives are taken into consideration if decisions are made.
