

Mark Tempelman (MSc)

To introduce myself, I am a lecturer and internships & thesis coordinator within the Communication Science department. Being a member of the Faculty council for the past four to five years, I have always been particularly concerned with the educational aspects the Faculty Council has to deal with. This may for example concern the annual fixing of the Teaching & Examination Regulations, but also the (educational) Quality Control Plan or a support plan regarding the transition of Dutch bachelor programmes towards English taught programmes. Beyond these content related aspects, I am also interested in developing myself by learning more about the governmental principles within an (academic) organization.
