Background

After being born and raised in Lelystad, Flevoland, I went to study here in Enschede. I am currently studying IBA where I can expand my knowledge on all different kinds of business themes. Something I quite enjoy doing.

In my board year, I had the opportunity to gain experience on a whole range of organisational levels within our faculty. These experiences led to my belief that there is a lot to be achieved to improve the processes around student involvement on all the tiers in our diverse faculty!

I want to make a difference by using the knowledge and experience related to educational and organizational processes that I gained in my board year. A board year where I actively contributed to achieving changes in educational procedures to make sure students are better represented in influential advisory bodies throughout our entire faculty.

Other activities

Active member and board member at Study Association Stress.
IBA/BA Programme Committee member.
Student member Advisory Council IBA/BA.
