

## Lisa Anna Listing

Hi, my name is Lisa van Biert, a second-year Psychology student. I am running for a seat in the faculty council of BMS since I want to represent all of us, also those students who are frequently forgotten within the faculty. In honour of my study, together with your vote, I would like to be part of the council and contribute to a fruitful faculty council, especially on behalf of the psychology students.

Some of my main issues are:

- Improvement of the level of English of the teachers
- Tutorials are meant to improve one's skills and should be offered by experienced workers who provide us with their knowledge and experiences.
- Incorporation of more people who have practical experience within their respective work field. By doing so, students can gain practical insights and experience beyond the scope of the university.
- The individual should be considered. Nowadays there is too much focus on groups. Rules should apply, however, there should be room for exceptions regarding individual cases.
- More space and opportunities for individual growth beyond the set curriculum. There is insufficient space for personal development including fulfilment of one's own choices.

Do you agree with me? Do you also want some changes within this faculty or the university as a whole? Then vote for me during the upcoming faculty council elections. Vote Lisa Anna Listing and let your opinion be heard in the faculty council!
