ODISSEI

WELCOME TO ODISSEI

Better Infrastructure.
Better Science.
Better Society.

ACCESS WORLD-CLASS DATA

Unlock access to premium datasets for your research needs

1

CBS Microdata

CBS Microdata provides comprehensive administrative data covering the entire population of the Netherlands, enabling detailed & impactful research.

2

LISS Panel

The LISS Panel is a premier longitudinal study offering rich data sets, supported by competitive grants exclusively for researchers.

3

Large Scale Data Collections

ODISSEI finances NL participation in major data initiatives like SHARE, ESS, LIS, EVS, GGP and the NKO. These data are easily accessible and free for researchers to use.

4

Sensitive Data

Access data from collections such as Popnet, Firmbackbone, Exposome-NL, YOUTh, & high resolution versions of the LISS Panel.

POWERFUL COMPUTING RESOURCES

Unleash the potential of social science research

ODISSEI Secure Supercomputer

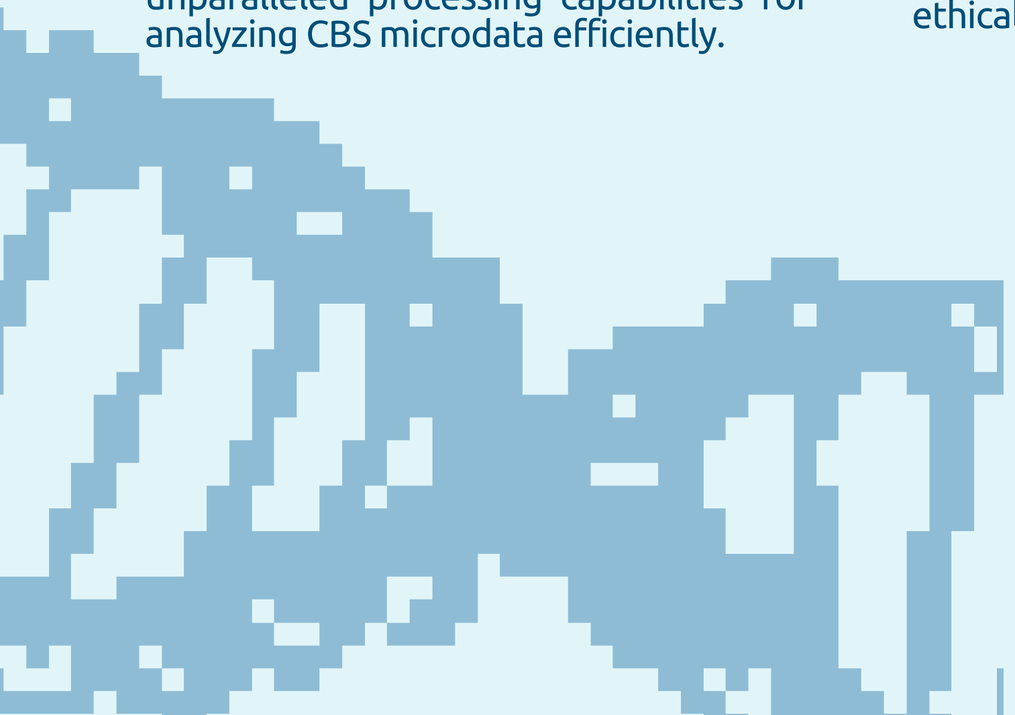

The OSSC is the fastest computing facility in the Netherlands, enabling unparalleled processing capabilities for analyzing CBS microdata efficiently.

Secure Analysis Environment

SANE provides a trusted environment for safely working with sensitive datasets, ensuring compliance with legal and ethical standards during research.

20TB Free CBS Data Storage

There is 20TB of free storage for researcher-generated files within the CBS microdata environment, facilitating effective data management and open science using administrative data.

ACCESS GRANTS

Get started with ODISSEI through small grants

1

Free Authorization of New Users and Discount on Project Start Up Costs

Researchers who have never used CBS data before can get authorized for free, and new projects can benefit from a lower starts up fee, providing immediate access to valuable resources.

2

Microdata Grants

Competitive funding is available to cover the costs associated with accessing CBS microdata, easing financial burdens on research projects.

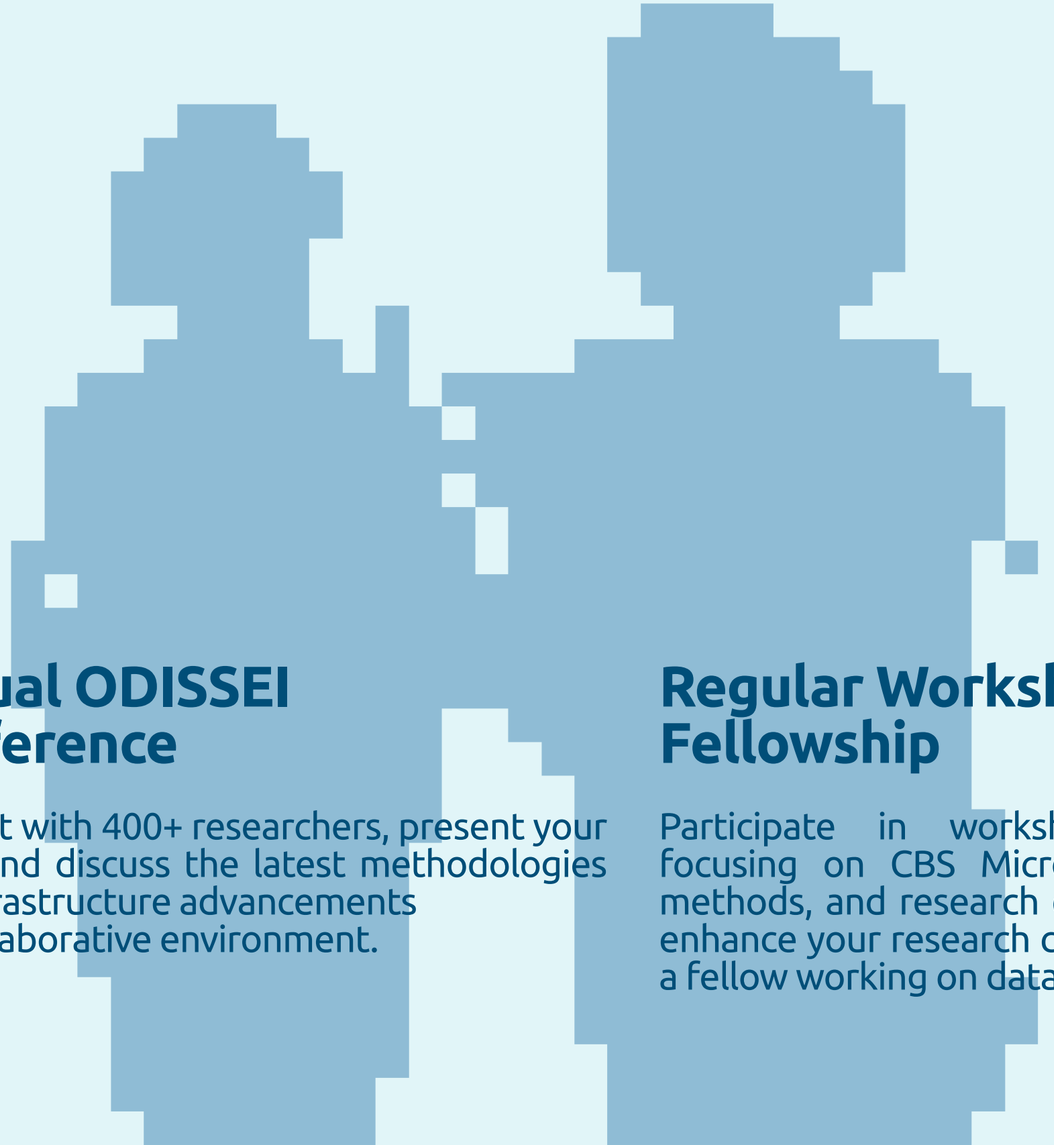

3

LISS Panel Grants

Financial support specifically for fielding studies in the LISS panel is available, helping researchers conduct impactful longitudinal research.

LEARN & GROW

Enhance your skills
with unique learning opportunities

SICSS-ODISSEI Summer School

An annual intensive program offering hands-on experience in computational social science, using data and tools from the ODISSEI ecosystem.

Annual ODISSEI Conference

Connect with 400+ researchers, present your work, and discuss the latest methodologies and infrastructure advancements in a collaborative environment.

Regular Workshops & Fellowship

Participate in workshops & bootcamps focusing on CBS Microdata, computational methods, and research ethics to continuously enhance your research capabilities, or become a fellow working on data related challenges.

EXPERT SUPPORT

Get comprehensive assistance for your research journey

ODISSEI SoDa Team

The SoDa Team offers specialized support in computational methods, machine learning, and text analysis to enhance your research capabilities.

FAIR Support

Receive guidance on data management, documentation best practices, and open science consultations to ensure compliance and accessibility for your projects.

Grant Application Support

Expert assistance is available to help researchers prepare competitive proposals and navigate funding opportunities effectively for their research projects.

Get Started

Take your first steps with ODISSEI's resources

Subscribe to the Newsletter

Stay updated with opportunities, deadlines, and events by subscribing to ODISSEI's monthly newsletter, ensuring you don't miss out on essential information & community developments.

Listen to ODISSEI Podcast Series

Learn more on the developments in the infrastructure and in the field of social sciences in the Netherlands

Visit Our Website

Explore the extensive facilities & datasets available at ODISSEI's website, designed to help you navigate the valuable resources for your research needs and interests.
