

Evaluation report

Transport in turbulent chemically reacting flows

The evaluation committee has evaluated the course Turbulent Transport by sending an online questionnaire to 19 students. 8 students filled in the questionnaire, which gives a response of 42%.

The overall appreciation for the course Turbulent Transport is marked with a 7.3. Students find the learning outcome relevant (9.3) and the contents of the course interesting (9.0). The availability of the teacher is marked with a 7.5. Unfortunately all other subjects of the evaluation are marked beneath the required 7. Students are not satisfied with the study material (5.1), think the subject did not become clear (5). Further the requirements for examination were not clear (5.5). In the absence of remarks of the respondents we are not able to make a conclusion with respect to these low grades or make a proper recommendation.

These are the main conclusions of the evaluation. The interpretation is based on the remarks of the respondents. For an overview of the results, see the graph at the end of this report.

Overview:

- Most marks are given on a scale from 1-5 and converted to a scale from 2-10 by multiplying with a factor 2. Therefore, a mark of 6.0 or higher is sufficient.
- The height of the bars in the graph represents the mark. The thin line at the top of the bars gives the standard deviation.
- Tempo of lecture grades: 2 is too fast, 6 is perfect, 10 is too slow.
