---

*The evaluation committee has evaluated the course Surface Technology by sending an online questionnaire to 55 students. 4 students filled in the questionnaire, which gives a response of 7%.*

The course Surface Technology scores an average of 4.1 which is good for a master course. All sub marks are more than sufficient and there aren't any notable results. Because of the lack of remarks it is not possible to give any recommendations. It can be concluded that this is a good course due to the good grades and the lack of recommendations.

*These are the main conclusions of the evaluation. The interpretation is based on the remarks of the respondents. For an overview of the results, see the graph at the end of this report.*

## Overview

- All marks are given on a Likert-scale from 1-5. For master courses, a mark of 3.5 or higher is sufficient.
- The height of the bars in the graph represents the mark. The thin line at the top of the bars gives the standard deviation.

## Explanation of marks

- Total 'first impression rating' is the mark given to the question: Overall appreciation.
- Ability to study is the average point of the marks given to the part of study material.
- Relevancy is the mark given to the question: Relevancy of the course.
- Quality of education is the average point of the marks given to the parts "lectures" and "practices".
- Coordination / Planning is the average point of the marks of "Adequate Information on Blackboard" and "Teacher available for questions".
- Examination / Assignments is the average point of the marks given to the Examination /Final Assignment part.
- Average is the mean of all given marks.

---

<b>Marks</b>
