Position: Architect/3D rendering and Visualisation Specialist/Algorithmic designer

Location: Rotterdam

Start: April 2016

Haas&Hahn are looking for a talented Architect or 3D rendering and visualization specialist with excellent rendering and animation skills. You will be responsible for producing high quality 3D representations of future painting projects by Haas&Hahn (renderings, animations and videos). Experience with architectural, structural and or data visualisation. Ability to integrate code into a 3D environment is an asset.

Requirements:
- 3+ years of proven experience in 3D architectural rendering, illustration and graphic design at various scales in a large architecture office or similar studio experience, as well as experience with animation and motion graphics
- Extensive experience with common 3D design programs (AutoCad, 3D Max, VRay for 3D max, Rhino, Adobe CS Suite).
- Fluency in written and spoken English (other languages are considered an asset)
- Understanding of architecture and graphic disciplines
- Candidates with a degree in architecture and/or other related graphic disciplines are preferred
- Team player
- Working flexible hours and being standby to communicate and work across different timezones

When submitting work samples please indicate what your role was in the creation of the image and what applications were employed. Might you have work online please be sure to include a link in your application.

Please send your CV with contactdetails to: jobs@haasandhahn.com and answer the below questions. Write your answers in Bold below the questions and keep it short. Attach the edited document with your name added to the end of the

filename.

- What is the first reason why you would like this job?

Your answer.......

- How many years of professional or internship experience do you have?

- What and where did you study and when did you graduate?

- How old are you?

- Where are you situated?

Position: Architect/Graphic Designer

Location: Rotterdam

Start: 2016

Haas&Hahn are looking for an allround designer with architectural experience. The main focus will be on making schematic illustrations of existing architectural structures and applying graphic designs to the surfaces. We need someone who is strong in graphic design and experienced with perspective and depth. Someone who can work with precision and be art-directed. Knowledge of 3D software highly appreciated. Perfect English and preferably Portuguese language skills.

Requirements:
- 3+ years of proven experience in architecture rendering, illustration and graphic design at various scales in a large architecture office or similar studio experience.
- Extensive experience with 3D software (AutoCad, 3D Max, VRay for 3D max, Rhino, Adobe CS Suite).

- Fluency in written and spoken English (other languages are considered an asset)
- Understanding of architecture and graphic disciplines
- Candidates with a degree in architecture and/or other related graphic discipline are preferred
- Team player
- Working flexible hours and being standby to communicate and work across different timezones

When submitting work samples please indicate on the images what your role was in the creation of the image and what applications were employed. Might you have work online please be sure to include a link in your application.
