

LIBERTY GLOBAL

Challenge the norm.

Be better connected.

Liberty Global Technology & Innovation Graduate Program Based in Amsterdam

This is an opportunity to put your stamp on the world's largest international TV and broadband company. To gain end-to-end exposure across the whole of our Technology & Innovation organisation. To have a voice, to share your ideas, to challenge how we work. Ultimately, this is about shaping our business as you build your future career.

Technology & Innovation is the lifeblood of Liberty Global – we're committed to delivering transformational products and services that help improve and simplify the digital lives of our customers. Lasting for two years, the Program will see you undertaking 6-month placements in a range of departments:

| | |
|----------------------------|--------------------------------|
| Product Development | Mobile Network & Operations |
| Delivery Group | IT |
| Technology | Supply Chain |
| Access Network & Operation | Tech Ventures |
| Core Network & Operations | Capital Performance Management |
| Strategy | |

You'll need to be:

- Qualified with, or on course for, at least a 2:1 or equivalent
- Passionate about pursuing a career in a Technology & Innovation field
- Someone who enjoys being challenged
- A natural leader, a big thinker – you can collaborate, analyse problems and come up with great ideas
- Driven, with the confidence and resilience to get things done
- Fluent in English with global mobility
- Eligible to work in the UK and EU

Benefits: Localised salary and benefits package

Application deadline: 21st May 2017
