

A FAMILY COMPANY

SC Johnson has an opportunity for a Packaging Engineer in the Research, Development and Engineering Team based in Mijdrecht, Netherlands.

Our internal job title at SC Johnson is Senior Associate - Packaging Engineer - Netherlands.

Initially, we offer fixed term 12 months contract.

ABOUT SC JOHNSON:

SC Johnson (SCJ) is one of the world's leading makers of household brands. The company has operations in more than 70 countries and sells products in virtually every country around the world. Its product portfolio includes global brands such as Pledge®, Duck®, Mr. Muscle®, Windex®, Scrubbing Bubbles®, Glade®, Raid®, OFF!®, Baygon® and Ziploc®.

The company has been making great products for more than 125 years and the same family that started the company still owns and runs it today. For over a century, spanning five generations, the Johnson family has demanded the best for families everywhere. We currently employ approximately 13,000 people globally and generate \$10 billion in sales. At the same time, we've established a generations-long legacy of environmental responsibility, community leadership and providing great places to work. We do this because we want to do what's right for our business today, and also what's right for people and the planet tomorrow.

ROLE SUMMARY:

This is an exciting opportunity for Senior Packaging Engineers who have desire to lead the packaging solutions for a diverse range of products and develop their capability further. The RD&E team work with a broad catalogue of bottles, aerosol cans and valves, flexible pouches, candles, trigger sprays, cream sticks and more.

You will find yourself working in a hugely supportive and collaborative team with great motivation to develop skills, knowledge, and innovations. The team is very driven, managing or delivering on a number of packaging development projects simultaneously. They have a lot of fun doing it too.

RESPONSIBILITIES:

- Qualification & commercial deployment of products within EMEA (Europe, Middle East, Africa)
- Working across multiple categories; pest control, home care, air care and shoe care
- Partner with Global Innovation Centers (based in the US and China)
- R&D lead for product changes within EMEA & partnered with global peers.

A FAMILY COMPANY

- Define packaging components/manufacturing instructions by executing required trials
- Supporting varied manufacturing base (100+ internal SCJ factories & third-party manufacturers)
- Ensuring product compliance with external legislation/directives and SCJ's corporate standards

REQUIREMENTS:

- At least a Bachelor degree in engineering or science, for example Industrial Design, Packaging, Materials
- 3 to 10 years' experience in a role of packaging engineer, component design, materials or similar
- Expertise in production and packaging environments
- Proven ability to lead and influence peers in multiple running projects
- Exhibits excellent organizational, prioritizing and problem-solving skills
- Proven capability to lead decision making and peers

You need to be legally eligible to work in the country of application.
