

Planning 2011-2012

There are programmes and course for CreaTE and HMI. The formal summary is in the programme appendices of the Teaching and Examination Regulations. These summaries are enclosed.

Each year we consider revisions in the programmes. I want to have a first discussion with the programme committee about the revisions

Issues for that discussion are (for HMI and CreaTe, except issue 4):

1. Do we have to improve the programme as a whole, maybe take courses together, or split courses in two, should we reconsider the relative weight of various themes in the curriculum in terms of study load, should we reconsider final qualifications at some points
2. Do we have to improve/adapt individual courses, are there courses missing, are some course maybe not so relevant any more (this applies both to HMI and CreaTe)
3. Must we improve the way courses are scheduled relative to one another
4. What about the third year CreaTe.
